VOC/QUOTE

The Lighter Touch 100

PANORAMA OF WORDS

INTRODUCTION

The study of the English language has spread all over the world, and high school and college students everywhere have come to realize that language mastery depends on the possession of a comprehensive vocabulary. This is just what *1100 Words You Need to Know* has been offering through the five earlier editions and continuing on this sixth one.

We are proud that Amazon.com has rated this book as the number one best seller in its category. In addition to the various exercises that help readers learn challenging vocabulary, we have now added a section called “The Lighter Touch 100,” which shows that vocabulary can be taught with a sense of humor. By investing a mere 15 minutes with this new book, you will soon see a dramatic improvement in your vocabulary.

WEEK 1 ❖ DAY 1

READING WISELY

The youngster who reads *voraciously*, though *indiscriminately*, does not necessarily gain in wisdom over the teenager who is more selective in his reading choices. A young man who has read the life story of every *eminent* athlete of the twentieth century, or a coed who has *steeped* herself in every social-protest novel she can get her hands on, may very well be learning all there is to know in a very limited area. But books are *replete* with so many wonders that it is often discouraging to see bright young people limit their own experiences.

NEW WORDS

voracious

və rā' shəs

indiscriminate

in' dis krim' ə nit

eminent

em' ə nənt

steeped

stēpt

replete

ri' plēt'

Sample Sentences On the basis of the above paragraph, try to use your new words in the following sentences. Occasionally it may be necessary to change the ending of a word; e.g., *indiscriminate* to *indiscriminately*.

1. The football game was _____ with excitement and great plays.
2. The _____ author received the Nobel Prize for literature.
3. My cousin is so _____ in schoolwork that his friends call him a bookworm.
4. After skiing, I find that I have a _____ appetite.
5. Modern warfare often results in the _____ killing of combatants and innocent civilians alike.

Definitions Now that you have seen and used the new words in sentences, and have the definitions “on the tip of your tongue,” try to pair the words with their meanings.

- 6. voracious
 - 7. indiscriminate
 - 8. eminent
 - 9. steeped
 - 10. replete
- a. of high reputation, outstanding
 - b. completely filled or supplied with
 - c. choosing at random without careful selection
 - d. desiring or consuming great quantities
 - e. soaked, drenched, saturated

TODAY'S IDIOM

***to eat humble pie*—to admit your error and apologize**

After his candidate had lost the election, the boastful campaign manager had *to eat humble pie*.

WEEK 1 ❖ DAY 2

SOLVING THE SERVANT PROBLEM

The worlds of science-fiction *abound* with wonders. Yet modern *technology* progresses so rapidly that what may be today's wild dream may be next year's kitchen appliance. A British scientist has *prognosticated* that within ten years every suburban *matron* will have her own robot servant. One task this domesticated *automaton* will not have to contend with will be scouring the oven because even today the newest ranges can be "programmed" to reduce their own baked-on grime to easily disposed of ashes.

NEW WORDS

abound

ə bound'

technology

tek nol' ə jē

prognosticate

prog nos' tə kāt

automaton

ô tom' ə ton

matron

mā' trən

Sample Sentences Now that you've seen the words used in context, and—hopefully—have an idea of their meanings, try to use them in the following sentences. Remember that a word-ending may have to be changed.

1. The mayor refused to _____ as to his margin of victory in the election.
2. The time is approaching when human workers may be replaced by _____.
3. A clever salesman will always ask a _____ if her mother is at home.
4. The western plains used to _____ with bison before those animals were slaughtered by settlers.
5. Man may be freed from backbreaking labor by the products of scientific _____.

Definitions Test yourself now by matching the new words with the definitions.

If you are not sure of yourself, cover the top half of this page before you begin.

- | | |
|------------------|--|
| 6. abound | a. an older married woman |
| 7. technology | b. branch of knowledge dealing with engineering, applied science, etc. |
| 8. prognosticate | c. a robot; a mechanical “person” |
| 9. automaton | d. to exist in great numbers |
| 10. matron | e. to predict or foretell a future event |

TODAY'S IDIOM

***a pig in a poke*—an item you purchase without having seen; a disappointment**

The mail order bicycle that my nephew bought turned out to be *a pig in a poke*, and he is now trying to get his money back.

WEEK 1 ❖ DAY 3

IT'S A MAN'S WORLD

How *paradoxical* that the world's greatest chefs have all been men! Cooking would clearly seem to be a field that lies exclusively within women's *realm*, yet the *annals* of cookery are replete* with masculine names: Brillat Savarin, Ritz, Diat, Larousse. To *compound* the puzzle, there has rarely been a *tinge* of rumor or scandal casting doubts on the masculinity of these heroes of cuisine.

(*replete—if you've forgotten the meaning, [click here](#))

NEW WORDS

paradox

par' ə dɒks

realm

Sample Sentences Try your hand now at using your new words by writing them in their correct form (change endings if necessary) in these sentences:

1. His gloom was now _____ by the failing mark on his geometry test.
2. The _____ of sports are replete* with the names of great black athletes.
3. One of the great _____ of American life is that though minority groups have suffered injustices, nowhere in the world have so many varied groups lived together so harmoniously.
4. A _____ of garlic is all that's necessary in most recipes.
5. The cruel king would not allow the prince to enter his _____, restricting him to the forest, which abounded* with wild animals.

(*abounded—studied previously, [click here](#))

Definitions If you are having trouble in picking the right definitions, it may be best *not* to do them in the order given, but to do the ones you are surest of first.

- 6. paradox
 - 7. realm
 - 8. annals
 - 9. compound (v.)
 - 10. tinge (n.)
- a. a trace, smattering, or slight degree
 - b. a statement that at first seems to be absurd or self-contradictory but which may in fact turn out to be true
 - c. to increase or add to
 - d. historical records
 - e. special field of something or someone; kingdom

TODAY'S IDIOM

***a flash in the pan*—promising at the start but then disappointing**

The rookie hit many home runs in spring training, but once the season began he proved to be *a flash in the pan*.

WEEK 1 ❖ DAY 4

HOW NOT TO GET YOUR WAY

It is difficult to change someone's opinion by *badgering* him. The child who begs his mother to "get off his back" when she *implores* him for some assistance with the household *drudgery*, may very well plead *interminably* for some special privilege when he wants something for himself. How paradoxical* that neither is able to *perceive* that no one likes being nagged.

(*paradoxical—studied previously, [click here](#))

NEW WORDS

Sample Sentences Getting the hang of it? Now go on to use the five new words in the following sentences—remember, past tenses may be required.

1. She does her homework on Fridays to save herself from the _____ of having to do it during the weekend.
2. The teacher continually _____ the pupil for the missing assignments.
3. The eminent scientist _____ difficulties in putting the invention into practice.
4. The sick child's mother _____ the doctor to come immediately.
5. I listened to the boring lecture for what seemed an _____ fifty minutes.

Definitions Pick the letter of the definition that matches your new word.

6. badger (v.)

a. unpleasant, dull, or hard work

- 7. implore
- 8. drudgery
- 9. interminable
- 10. perceive

- b. unending
- c. to plead urgently for aid or mercy
- d. to understand, know, become aware of
- e. to pester, nag, annoy persistently

TODAY'S IDIOM

***to pour oil on troubled waters*—to make peace, to calm someone down**

When I tried to *pour oil on troubled waters*, both the angry husband and his wife stopped their quarrel and began to attack me.

Reggie the Con Man

In the ①_____ of crime, there are few scoundrels who could match the exploits of Reggie Hayes, who also used the names of Reginald Haven, Ricardo Hermosa, Father Harris, and dozens of other aliases. Reggie's police record, principally in Chicago and Baltimore, is ②_____ with scams that he perpetrated upon gullible people. Generally, his favorite target was a ③_____ who should have known better.

Dressed as a priest ("Father Harris"), he was most convincing, however. His method of operation was to "find" a wallet stuffed with hundred dollar bills outside a supermarket and then ④_____ an unsuspecting woman to share his good fortune, since there was no identification in the wallet. But first, to establish her credibility, his victim had to put up a sum of money as a testimonial to her good faith. Mrs. Emma Schultz, age 72, tearfully told the police that she had withdrawn \$14,000 from her bank and placed it in a shopping bag supplied by the helpful priest. He told her to hold onto the bag while he went next door to a lawyer's office to make the sharing of their good fortune legal.

After a seemingly ⑤_____ wait, Mrs. Schultz discovered to her chagrin that the heartless thief had skipped out the back way, leaving her "holding the

bag”—a switched bag containing shredded newspaper—while he made his getaway with her life savings.

WEEK 2 ❖ DAY 1

TO THE POINT

Calvin Coolidge, our thirtieth president, was named “Silent Cal” by reporters because of his *laconic* speech. One Sunday, after Mr. Coolidge had listened to an interminable* sermon, a *throng* of newsmen gathered around him. An *intrepid* reporter *accosted* the Chief Executive: “Mr. President, we know that the sermon was on the topic of sin. What did the minister say?” “He was against it,” the *reticent* Coolidge replied.

The Best Laid Plans

Gloria Rogers overslept and then had to sprint to catch the same Greyhound Bus that she boarded on the last Thursday of every month. After a three-hour uneventful ride, she finally arrived at the bus terminal where a courtesy van was ready to transport bus passengers to Visitors Day at the State Penitentiary.

Although Gloria tried to act casual, she was more than a little nervous. Her boyfriend, Art, a convicted ① _____, had managed to gain admittance to the prison's hospital on the ② _____ of having a gall bladder attack. Under her own slacks and bulky sweater, Gloria was wearing a set of clothes that she removed in the hospital bathroom and passed on to Art. He planned to use them after making his escape in the back of the prison ambulance that was parked outside his ward.

Art had spelled out his escape plan during Gloria's last visit, spending an hour trying to ③ _____ her into being his accomplice. All that she had to do was appear to have a seizure. Then she would ④ _____ a story about her epilepsy while Art, with the smuggled clothes concealed under his prison bathrobe, would slip out of the ward during the excitement. Unfortunately for the schemers, a ⑤ _____ hospital guard spotted Art climbing into the rear of the ambulance and quickly foiled the escape attempt. The result was that Art had

three years added to his sentence and Gloria was imprisoned for her role in the misadventure.

WEEK 3 ❖ DAY 1

THE PEP TALK

“If there’s one thing I *loathe*,” the coach said, “it’s a quitter.” He had good reason to *reprimand* us at half-time, because the scoreboard revealed that we were losing, 45–20. WEEK 3 ❖ DAY 3

COURTROOM DRAMA

There was an *ominous* silence when the jittery defendant rose in court. He explained in a *tremulous* voice what had led him to *repudiate* his confession made at the police station on the night of the crime. The audience began to buzz excitedly until the judge demanded a *cessation* of the noise. Although the district attorney *bristled* with anger, the defendant kept insisting that his rights had been violated because he had not been told that he could see a lawyer before confessing.

Desert Storm Decision

In the 1991 Persian Gulf War, where the United Nations forces, led by Americans, ousted the invading Iraqi army from Kuwait's soil, the ① _____ of combat took place in short order after the Allies were able to ② _____ control of the skies from the ③ _____ Saddam Hussein's air force.

General H. Norman Schwarzkopf, the U.S. field commander, tended to ④ _____ when asked by the media why he hadn't pursued the enemy all the way to Baghdad, saying:

"It would have been foolhardy for us to try to occupy that capital city and pile up American casualties from sniper attacks by Iraq's guerillas. That may be hard for you Monday morning quarterbacks to understand but I thoroughly agreed with the president who was convinced that such an action would have sent a bad message to the Arab world and would have splintered the Allied partnership."

Schwarzkopf reiterated that it was his mission to hurl back the invaders with a minimum of bloodshed but not, he added in a ⑤ _____ tone, "to splatter Saddam over the desert sands. That dictator's days are numbered," the general concluded, "but I expect his end is likely to come at the hands of his own people."

Want to Run for Office?

In recent years, we have seen the phenomenon of incumbent politicians retiring in record numbers. When interviewed, many of them admitted that they had lost their taste for the job because of the abuse to which an ① _____ for office is subjected.

“My last campaign was a ② _____ affair in which my opponents did everything to ③ _____ my record and air ④ _____ charges about my private life,” said one congressman. “I don’t have to stand still for such treatment,” he added, “which was terribly embarrassing to me and my entire family.”

Citizen groups, appalled by the candidates’ mudslinging, have sought to do something about the situation. Committees have been formed in a number of states to study ways to elevate the tone of the process, reduce the emotionalism, and eliminate the ⑤ _____ of name calling that is generated as election day draws near.

“Unless we clean up this mess,” said the chairman of an Illinois caucus, “we will lose the best and the brightest from the political arena. After all, who but a masochist wants to be a punching bag, the subject of daily vilification in the media, and a target for every malcontent in town?”

WEEK 5 ❖ DAY 1

CHEATING

During my first weeks at the new school I observed that cheating was *rampant*. I had always considered it rather *inane* to cheat on a test because of my code of *ethics*, and because so much was at stake. Apparently the other students didn't *concur*. In fact, even the presence of a proctor did not intimidate* them. Far from being a *clandestine* activity, the cheating was open and obvious.

Driving While Drunk

Throughout literature we find recurring tales of forthright people who are outspoken in condemning illegal practices only to be brought low themselves when they, or members of their families, commit such acts. Since literature reflects life, we can expect to find similar instances in which a person's ① _____ are compromised, and he falls prey to the ② _____ evil that he had publicly denounced.

Take the story of Barry Vernon (not his real name), an aggressive Ohio district attorney. Vernon could be counted upon to make ③ _____ remarks about anyone who was driving while intoxicated. On numerous speaking engagements, he railed against drunkenness and swore that any such ④ _____ who was found behind the wheel of a car would be prosecuted to the full extent of the law.

As fate would have it, Vernon's own son smashed into several cars, injuring four people seriously, and then failed a sobriety test.

Following that ⑤ _____ violation of the law, Vernon resigned from office, saying that as a private citizen he would continue his crusade against those who drive under the influence of alcohol. Meanwhile, he wished to spend more time with his son to try to understand the young man's behavior.

WEEK 6 ❖ DAY 1

THE NEWSPAPER UMBRELLA

Our neighbor is an *affluent* inventor whose latest brainstorm, a *feasible* umbrella substitute, has been featured in many magazines. As simply as the eye can *discern*, it is a hard plastic strip, about the size of a ruler, which fits comfortably into a woman's handbag or a man's suit jacket. If a person is caught in a sudden rainstorm, he swings the plastic open in the shape of a cross. Attached to each arm is a clip-like device. Next, he takes the newspaper he is carrying and slides it under each of the four clips. Now, equipped with a rigid head covering he can *sally* forth to face the elements. To the *consternation* of the umbrella manufacturers, it has been enjoying a brisk sale, especially among commuters. If it continues to do well, it could have a pernicious* effect upon the umbrella industry.

PATENT PENDING

My buddy Verne, a *precocious* automotive wizard, and I were inspired to do some inventing on our own. We thought it might be feasible* to park a car parallel to a space on the street. Then, by pressing a button, we could raise the four tires off the ground slightly, while dropping two special wheels perpendicular to the curb. It would then be child's play to roll into the narrowest of parking spaces. We took the idea to Ed Greene who runs the Ford agency in order to elicit* his reaction. After a *perfunctory* glance at our plans, to our *chagrin* Ed snorted that our idea was inane,* but we decided that he was just jealous of our brilliance.

Tomorrow we are going to start on a computer that will enable us to measure the intelligence of *perverse* automobile dealers who like to *deride* the efforts of junior geniuses.

Trouble at Truman High

It was a quiet morning at Harry S Truman High School. “Too quiet,” Principal Edna Suarez remarked to her secretary. “It’s just when things are this serene that I start to get an uneasy feeling.”

Mrs. Suarez’s sensitivity to life among 3,000 teenagers quickly proved to be accurate. The first evidence of trouble came with a phone call from the teacher in charge of the cafeteria who needed help to ①_____ a disturbance. When Mrs. Suarez arrived on the scene, much to her ②_____, students were pounding on their tables, throwing food on the lunchroom floor, and making a complete ③_____ of school regulations. It took the principal only a moment to ④_____ who the two ringleaders were and to summon them to her office.

Vincent, 16, and Elena, 15, admitted to having stirred up the protest. They gave as their reasons the poor quality of food served and the dirty environment. “It’s like a pigsty down there,” Elena declared, “and the food is fit only for animals!”

What they had done, Mrs. Suarez told them, was inexcusable, and she ticked off a list of reasons that made their conduct dangerous and subject to school discipline. “What you were trying to do,” Mrs. Suarez explained, “might be

considered ⑤ _____ by some but you could have come to me, alone or with a committee, to register your complaints. I would have investigated and, if there was merit to your charges, would have taken the necessary action. Now I'll have to ask you to bring your parents to see me on Monday and to stay home until then."

Vincent and Elena seemed to be chastened by Mrs. Suarez's lecture. However, on leaving her office, Elena told an assistant principal that in a similar incident on a television show she learned that direct, dramatic action usually gets quicker results than lengthy debate. He advised her to bring that question up in her social studies class when she returned from suspension.

WEEK 7 ❖ DAY 1

MUCH ADO ABOUT A HAIRCUT

Perhaps you read about our school in the newspapers? We were one of the first to have a showdown on the topic of long hair for boys. Two honor students, Ron Harris and Len Chester, were sent to the principal by their French teacher, an *implacable* foe of nonconformists, who went into a *paroxysm* of anger when she spied the boys in the hall. At first it seemed like a simple case. The school would reprimand* the boys for their *reprehensible* appearance and order them to cut their hair or be suspended. But the boys' parents decided that the school had overstepped its *jurisdiction*; they took their case to the newspapers. What had started as a local *skirmish* now began to take on the appearance of a full-scale war.

The Reading of the Will

One full week after the funeral, the immediate family of millionaire Charles Hudson was gathered in a law office to hear the reading of the deceased's will. Mr. Hudson's wife, thirty years his junior, was prepared for a bitter ① _____ with his former wife and her son. The lawyer, Don Rollins, anticipated a ② _____ session because he was the only one who was ③ _____ of the contents of the revised will that Hudson had ordered drawn up six months prior to his death.

The current Mrs. Hudson, attired in her smart widow's weeds, expected that she would receive the lion's share of the estate. The former Mrs. Hudson felt that she was entitled to most of the estate since she was practically ④ _____ at the present time, despite her substantial alimony payments.

Lawyer Rollins cleared his throat and began to read:

"To my present spouse I leave my town house where she can continue to store the jewels, shoes, dresses, and furs she accumulated in two years of shopping and marriage.

"To my son, who has put off finding a career until my estate would enrich him, I leave the sum of ten dollars for cab fare to the unemployment office.

“To my former wife whose ⑤ _____ behavior I tolerated for three decades, I leave my beach house where she can continue to work on her tan, something that she prized above our happiness.

“To the Society For the Prevention of Cruelty to Animals I leave the remainder of my entire estate, knowing they will put it to better use than anyone in this room.”

The lawyer was wrong. No outcries. Silence, supreme silence, reigned among the shocked audience.

Aftermath of an Earthquake

The Egyptian earthquake in October 1992 killed 600 residents of Cairo and hospitalized thousands of others, many of whom were expected to ① _____ as a result of their injuries. Especially hard hit were the people who inhabited the city's slums, who had to seek ② _____ in those government buildings, schools, and factories that remained standing.

Muslim fundamentalists were active in providing relief to the survivors in the form of food, water, blankets, and tents to house the more than 300 families made homeless by the disaster. In the midst of a rubble-strewn street, a large tent was set up, bearing the banner, "Islam is the Solution." Believers took the opportunity to spread the message that the earthquake was a ③ _____ of worse things to come, and that a wayward population must follow God's laws if they expected to ④ _____ to heaven.

Throughout history, following volcanic eruptions, hurricanes, tidal waves, and other calamities that periodically ⑤ _____ mankind, religious leaders have used such occurrences to bring the people back to their faith.

"Unless we return to Allah," said a priest, "we can expect more divine punishment."

Since many Egyptians had expressed unhappiness about their government prior to the earthquake, there was a good chance for Muslim fundamentalists to seize the opportunity to win new converts by showing that the answer to recovery was not through man's efforts but through God's.

JUST SPELL THE NAME CORRECTLY

P. T. Barnum, the great circus *impresario*, was once accosted* by a woman who showed him a scurrilous* manuscript about himself, and said that unless he paid her, she would have the book printed. Barnum rejected the *extortion* attempt. “Say what you please,” he replied, “but make sure that you mention me in some way. Then come to me and I will estimate the value of your services as a publicity agent.” Barnum obviously felt that *adverse* criticism was an *asset* for a public figure. A man who seeks the limelight should not care what is written about him but should be concerned only when they stop writing about him. Barnum’s philosophy suggests that we might do well to review the plethora* of publicity given to rabble-rousers and *bigots*.

BIGOTS* GET PUBLICITY

Today, the *blatant* bigot, the leader of a lunatic fringe, and the hate-monger, each with his tiny *entourage*, find it relatively easy to attract publicity. Newspapers give space to the *virulent* activities of those agitators on the grounds that they are newsworthy. TV producers and radio executives, seeking for sensationalism, often extend a welcome to such controversial characters. “Yes,” said the host of one such program, “we invite bigots, but it is only for the purpose of making them look ridiculous by displaying their inane* policies to the public.” Some civic-minded organizations have answered, however, that the hosts are not always equipped to demolish those guests, and even if they were, the audience would still be exposed to the *venom* they *spew* forth.

COPING WITH BIGOTS*

Suppose a bigot wished to organize a meeting in your neighborhood. Since we cherish freedom of speech, we are *loath* to deny the request, even if he preaches hatred. As a result, hate-mongers are given the opportunity to rent halls, conduct meetings, publish abusive literature, and *solicit* contributions. What can be done about them? One *astute* observer, Prof. S. Andhil Fineberg, *advocates* the “quarantine method.” His plan is to give such groups no publicity and to ignore them completely. MORE THAN SILENCE

The quarantine method for handling bigots implies more than giving them the silent treatment. Prof. Fineberg urges community-relations organizations to *scrutinize* the *nefarious* activities of hate-mongers and to be prepared to furnish information about them to *amicable* inquirers. When a rabble-rouser is coming, those organizations should privately expose him to opinion-molders. In addition, constructive efforts should be taken to induce people to involve themselves in projects for improving intergroup relations. This Century's Deadliest Disease

When the American public started to hear about the AIDS virus in the 1980s, there was a measure of concern but no real alarm. After all, some said, it was a problem solely for a small group of intravenous drug users who shared dirty needles, and for the homosexual community.

But as the numbers of afflicted people grew during the 1980s and 1990s, we began to ①_____ the tragic news stories more closely. The deaths of young people like Ryan White and Kimberly Bergalis, not members of the at-risk groups referred to above, convinced us that what was at first regarded merely as a ②_____ illness was actually a ③_____ threat to the general community.

In the mid-1980s, ④_____ medical researchers were optimistic that a vaccine for AIDS would be found in short order. Those predictions proved to be inaccurate. In October 1992, former Surgeon-General C. Everett Koop said that he doubted we would ever find a cure for the disease. With over 200,000 Americans already having succumbed to the ⑤_____ killer, and another 300,000 who were HIV-positive and could contract a full-blown form of AIDS, Koop's statement sent chills throughout the country.

A prominent AIDS expert, however, took issue with Koop. "The fight will be

difficult,” said Dr. Harley Smith, “but we will find an answer very shortly.”
Now, in the twenty-first century, the answer is apparently at hand.

Once the *salient* characteristics appear (ten days to six months) then death is *imminent*.” “What are the symptoms?” asked Mrs. Hart. “Pain and numbness, difficulty in swallowing, headaches and nervousness. The Potato that Strangled Idaho

People who are ①_____ about the sight of blood or ②_____ in horror from most forms of violence would do well to avoid some of the movies now being shown at their local cinemas. Producers have learned that films that scare the patrons out of their seats, ironically, put millions of fans into those seats, keeping them ③_____ in the goose pimple-inducing spectacles that flash across the screen.

Of course, each movie carries with it a rating that indicates its suitability for certain age groups, either because of its subject matter, language, presentation, or level of violence. Pictures with a “G” rating are approved for all audiences, while, at the other end of the scale, those that are given an “X” rating are for adults only with no children allowed under any circumstance. Getting an “R” rating indicates that the movie is restricted (no one under 18 admitted without an adult) but some Hollywood moguls consider the “R” to be the magnet that insures box office success. And we can be sure that as long as shock films ring up a merry tune on the cash registers, producers will not ④_____ from making them.

A director who specializes in making gory films involving monsters, vampires, and brutal serial killers boasted in a college lecture that his work was in good taste. One student who disagreed was provoked to ⑤_____ that

in his opinion the diet of “shock-schlock” movies was in worse taste than those pictures that contained vulgar language and nudity. “At least they’re honest,” he declared.

WEEK 11 ❖ DAY 3

THE POLICE FIND THE DOG

Forty hours had *elapsed* before the police work and the publicity paid off. By *meticulously* checking the registrations of every red station wagon in the neighborhood and then cross-checking dog licenses, the police narrowed the search to four owners. After a few telephone calls, the apologetic owner was located and directed to bring her muzzled German shepherd to the Hart *domicile*. Bobby identified the dog, and the animal was taken to a veterinary's clinic to have the necessary tests performed. The *lax* owner, Mrs. McGraw, admitted that the dog had a *sporadic* mean streak, but she scoffed* at the idea of rabies. Jerry Hart noticed for the first time in two days that his uneasy feeling had departed.

Regis, Oprah, Ellen, et al.

The television talk shows of our era, featuring such ①_____ public figures as Regis Philbin, Oprah Winfrey, and Ellen De Generes, attract millions of daytime viewers and constitute a powerful influence on the American scene. When the media can hold the attention of so sizable a chunk of couch potatoes, it pays to scrutinize it closely.

A student at Stanford University, doing her doctoral thesis on the unusual popularity of the afternoon talk shows, noted the fierce competition among those programs for guests who are off the beaten track. According to her:

“Almost every irregular, ②_____ life-style you can think of has already been featured on one of the shows and probably on all of them, when you add Montel Williams, Jerry Springer, and others of that ③_____ who serve as network hosts. They have shown teenagers who marry people in their sixties, daughters and mothers who date the same man, men who have gone through a marriage ceremony with other men, women with prominent tattoos, and other people who are totally free of ④_____.”

“⑤_____ for our guests is so small,” said a producer, “that these shows are inexpensive to put on. And say what you want about good taste, millions watch us every day, and as long as the ratings are that healthy, sponsors will pay good

money to be identified with us.”

In the winter of 1941, Enrico Fermi and a number of other distinguished scientists *importuned* President Franklin Roosevelt for authorization to begin an all-out effort in atomic energy research. The scientists were alarmed by *incontrovertible* evidence of *surreptitious* German experiments, and they asked for speedy approval. Italian-born Enrico Fermi was the ideal man to lead the atomic research. Already in 1938 he had won the Nobel Prize for work with radioactive elements and neutron bombardment. Fermi had found a *haven* from the Fascists (his wife was Jewish) and he knew that if the Germans were the first to develop an atomic bomb it would mean that Hitler could *subjugate* the entire world. THE ULTIMATE WEAPON TAKES SHAPE

Enrico Fermi designed a device that could *eventuate* in a chain reaction. It consisted of layers of graphite, alternated with chunks of uranium. The uranium *emitted* neutrons, and the graphite slowed them down. Holes were left for long cadmium safety rods. By withdrawing those control rods Fermi could speed up the production of neutrons, thus increasing the number of uranium atoms that would be split (fission). When the rods were withdrawn to a critical point, then the neutrons would be produced so fast that the graphite and cadmium could not absorb them. In that manner a chain reaction would result. Slowly, Fermi's first atomic pile began to grow in a *subterranean* room at Columbia University. The big question remained—was it *viable*?

THE SQUASH COURT EXPERIMENT

As the pile grew, so did the entire project. Fermi moved his materials to an abandoned squash court under a football stadium at the University of Chicago. His pace accelerated because they were proceeding on the *premise* that the Germans were close to atomic success. Six weeks after the pile had been started, its critical size was reached. Three brave young men *jeopardized* their lives by ascending* the pile, ready to cover it with liquid cadmium if anything went wrong. Almost fifty scientists and several *incredulous* observers mounted a balcony to watch. One physicist remained on the floor; it was his job to extract the final cadmium control rod. Unbearable tension *permeated* the atmosphere. Fermi completed his calculations, waited for a *propitious* moment, and then gave the signal.

“I don’t care if it’s a dog, a pig, or an elephant,” Jagusak’s boss said. “If it benefits the department and our community, we’ll try it.”

WEEK 14 ❖ DAY 1

SUNDAY MORNING AT PEARL HARBOR

At breakfast time on Sunday morning, December 7, 1941, Dorie Miller was serving coffee aboard the battleship *West Virginia*. Dorie was black, and the highest job to which he could then *aspire* in the U.S. Navy was that of messman. While Dorie was technically a member of a great fighting fleet, he was not expected to fight. Most Army and Navy officers *inveighed* against blacks as fighting men. Although blacks were *nettled* by such *overt* prejudice, Dorie Miller apparently accepted being *relegated* to the role of a messhall servant. Now, as he poured the coffee, Dorie was wondering why the airplanes above were making so much noise on a peaceful Sunday morning.

WEEK 14 ❖ DAY 2

THE INFAMOUS* ATTACK

The coffee cups suddenly went spinning as an explosion knocked Dorie Miller flat on his back. Jumping up from his *supine* position, the powerfully built messman from Waco, Texas, headed for the deck. Everywhere that Dorie looked he saw smoke and *mammoth* warships lying on their sides. Overhead, dozens of Japanese dive bombers controlled the skies without a U.S. plane to *repulse* their attack. The *havoc* was enormous. Without hesitating, Dorie joined a team that was feeding ammunition to a machine gunner who was making an ineffectual* attempt to protect their battleship from being *razed* by the torpedo planes.

THE HEROISM OF DORIE MILLER

Men all around Miller were succumbing* to the *lethal* spray of Japanese bullets. He dragged his captain to safety and turned back to see that the machine-gunner had been killed. Dorie took the big gun and trained it on the incoming bombers. Within the space of ten minutes he was credited with destroying four bombers while dodging the bullets of their fighter escorts. The enemy *scurried* away, having struck the *incisive* blow that *precipitated* U.S. entrance into World War II. Amidst the dead bodies and the ruined fleet were the heroes such as Dorie Miller. Teen Talk Barbie, the best-selling \$50 model, has gone a step too far in the opinion of the American Association of University Women. Representatives of that group were ① _____ to hear that one of the four phrases that the doll is programmed to utter is, “Math class is tough.”

For years the university professors, as well as members of feminist organizations, have ② _____ against the ③ _____ that portrays girls as weak math and science students. “Because that brainwashing message is conveyed to girls at an early age, they come to accept what we consider to be a blatant ④ _____,” said Dr. Ellen Kaner, a Dallas chemist. “We are just beginning to make progress in our campaign to recruit women for challenging, well-paying careers in math and science,” she added, “and were shocked to learn that Barbie is spreading such harmful nonsense.”

Executives of the company that manufactures Teen Talk Barbie had to ⑤ _____ to set matters right. They admitted that the phrase in question, one of 270 selected by computer chips, was a mistake. In a press release, their president said, “We didn’t fully consider the potentially negative implications of this phrase. AN HISTORIC SUPREME COURT RULING

Lawyer Kroll *persevered* in his defense of Danny Escobedo. The case was argued before the Supreme Court, and in 1964, in a *landmark* decision, the Court reversed Danny's conviction. Legal aid, said the judges, must be instantly available to a suspect. Questionable Advertisements

The Nostalgia Factory, a Boston art gallery, staged an exhibit of advertisements that had outraged various segments of the community. For example, one of the fast food chains ran a TV commercial that showed unattractive school cafeteria workers in hairnets, making that experience less tasty than a visit to Roy Rogers. Another ad that drew criticism from psychiatrists and groups such as the Alliance for the Mentally Ill suggested to readers that, if they had paid \$100 for a dress shirt, they were fit candidates for a straitjacket. Similar sensitivity had restricted ad writers from using terms such as “nuts” or “crazy.”

Why such protests and where do they come from? Who is asking companies to ① _____ contracts with those agencies that are ② _____ in creating racist types of commercial messages? Parents who took exception to the Burger King spot that announced, “Sometimes You Gotta Break the Rules,” said no to it because it gave the wrong message to their children. And when a potato chip maker’s ad featured a “bandito,” angry Mexican-Americans used some choice ③ _____ in denouncing such a stereotype.

The conclusion to be reached is that segments of the population have become increasingly vocal about “insensitive” ads, demanding that corporations ④ _____ and never again commission advertisements that are clearly ⑤ _____

, provocative, and harmful to good human relationships.

One of the most interesting inhabitants of our world is the bee, an insect that is *indigenous* to all parts of the globe except the polar regions. The honeybee is a *gregarious* insect whose *habitat* is a colony that he shares with as many as 80,000 bees. Although the individual bees live for only a few days, their colony can be operative for several years. A *cursory* study of the activities of these insects reveals an orderliness and a social structure that is truly amazing. For example, bees in a particular hive have a distinct odor; therefore, when an *interloper* seeks access* they can identify him quickly and repulse* his invasion.

Each colony of honeybees consists of three classes: a) the queen who is a *prolific* layer of eggs; b) the worker who is the *bulwark* of the colony; and c) the *sedentary* drone whose only function is to mate with a young queen. The queen lays the eggs that hatch into thousands of female workers; some queens live as long as five years and lay up to one million eggs. The *frugal* worker builds and maintains the nest, collects and stores the honey, and is the *antithesis* of the lazy drone, or male honeybee, who does not work and has no sting. Let us examine the activities of the *altruistic* workers in greater detail. After the workers have constructed a hive of waterproof honeycomb (made from beeswax), the queen begins to lay eggs in the first cells. While some workers *embellish* the hive, others fly out in search of nectar and pollen. With their long tongues they gather nectar and use their hind legs to carry the pollen from the flowers. They fly directly back to the hive and then dance around the honeycomb, their movements indicating the direction of the flowers. Meanwhile, other workers have been cleaning cells, caring for the young, and guarding the precious *cache* of nectar. Another special *coterie* is entrusted with heating or cooling the hive. THE SAGA OF THE QUEEN BEE

Although the *virtuosity* of the workers is remarkable, the queen bee is really the main story. Workers choose a few larvae to be queens, feeding them royal jelly, a substance rich in proteins and vitamins. While the queen is changing from a larva to a pupa, a team of workers builds a special cell for her. Soon the young queen hatches, eats the prepared honey, and grows strong. After she kills any rivals who have the *temerity* to challenge her, an *amorous* note is injected. She flies from the hive and mates with one or more drones on her first flight. Then the process of egg laying begins. When her *progeny* *saturate* the hive, scouts are dispatched to find a new location, and the bees swarm after their leader to begin the amazing cycle again.

Cheating a Cheater

“Our neighborhood was so tough,” the comedian joked, “that two guys held up a bank and were mugged as they ran to their getaway car.”

Later that evening, as Roy and Timmy were discussing the comic’s routine, Roy was reminded of a true (he said) story that went like this:

Mr. D., the gang kingpin in our community, loved money. Like Silas Marner, the ① _____ weaver of George Eliot’s novel, he enjoyed counting his treasure each Friday night. Mr. D’s ② _____ was concealed in a wall safe behind a painting in his office. The \$50 and \$100 bills made his hands dirty as he counted them but Mr. D didn’t mind. The filth of the lucre did not disturb him at all.

One Friday evening, Roy continued, a brash ③ _____ had the ④ _____ to try to steal the ill-gotten gains. Having bought the combination from a relative who had installed Mr. D’s safe, he stuffed his loot into a laundry bag and was halfway out the door when he spied a \$10 bill on the floor. His ⑤ _____ made him go back for that small change, and in that moment, Mr. D. arrived on the scene.

The quick-thinking thief blurted out, “I’ll have the shirts back on Friday.” Hoisting the laundry bag over his shoulder, he was out the door before the

confused mobster could figure out what had happened.

Timmy, who had listened patiently, said, “I don’t believe a word of that story because it would take a guy with a great deal of *starch* to pull it off!”

WEEK 17 ❖ DAY 1

A PLAN TO FOOL THE NAZIS

One of the truly remarkable stories of World War II concerns a ruse* that was *perpetrated* with such *consummate* skill that it saved the lives of many Allied troops and helped to shorten the war. The simple, bold, and ingenious *subterfuge* which British officers *concocted* is the subject of Ewen Montagu's classic, *The Man Who Never Was*. In short, the idea was to plant *fallacious* documents concerning the Allied invasion of Europe upon a dead officer, have his body recovered by agents who would transmit the false information to Germany, and then observe the effects of the plan.

“MAJOR MARTIN” GOES TO WAR

After Commander Montagu and his colleagues had been given official approval for their dangerous escapade, they encountered *manifold* problems. First, they conducted an *assiduous* search for a body that looked as though it had recently been killed in an airplane disaster. Then, a detailed history of the man had to be invented that would be so *impeccable* that the enemy would accept its authenticity. This meant documents, love letters, personal effects, keys, photographs, etc. Each step was *fraught* with difficulty, but the schemers were unbelievably *resourceful*. As a result, in the late spring of 1942, “Major Martin” was prepared to do his part for his country.

Brother, Can You Spare a Dime?

The U.S. Department of Health and Human Services, in a ①_____ review of Social Security disability payments, focused on Jack Benson, a ②_____ Seattle panhandler. Mr. Benson had claimed that whatever money he collects on the street can be compared to the funds raised by legitimate charities, and, therefore, he is entitled to a federal deduction. Government officials regard his analogy as ③_____ and disagree. It is their contention that, since Benson's income is unearned, it should be subtracted from his disability payments.

Mr. Benson may not be highly regarded as a street beggar but that didn't stop him from going into the Federal District Court in Oregon to plead that his appeals for cash are an art form, thereby making him eligible for most of the \$472 a month that he had been receiving. Not so, declared the government, quoting from a 1990 ruling that found that "money received through begging is better classified as 'gifts' rather than as 'wages' or 'net earnings from self-employment.'"

Mr. Benson's lawyer, plunging into the legal ④_____, has not given up. She countered that, if Jack merely sat on a street corner with his hand out, the government had a good case. However, in her words, "Jack Benson is a ⑤_____ professional who has elevated begging to a respectable level because of his skill in actively seeking contributions."

It may take all of Benson's talent as a salesman to get the government to put some money in his collection basket.

A Shameful Situation

The plight of the migrant farm worker continues to frustrate the U.S. Labor Department, court officials, legislators, religious groups, and community agencies. Men, women, and children toil six and seven days a week to earn as little as \$50 to \$60 a week after being overcharged for their food, medicine, and basic living needs. They are housed in ramshackle dormitories, often with non-functioning toilets—a ① _____ of their employers' contempt for them; they lack hot water and showers, and are given food that is barely fit for human consumption.

Unscrupulous contractors scour the countryside in search of homeless, ② _____, and unemployed men and women, offering to put them to work at good jobs picking fruits and vegetables. The U.S. Labor Department investigates the ③ _____ of complaints of abused workers, issues fines, and revokes the licenses of contractors. WEEK 19 ❖ DAY 4

DISAPPOINTMENT AND DEDICATION

When Prince Schubert asked for additional *restrictive* measures, the people began to *balk*. Speaking on radio, the young reformer explained the reasons for higher taxes and food rationing; he was *blunt* when he stated the need for personal sacrifices. Nevertheless, the resistance to reform was great, and *nostalgia* for the “good old days” of King Andre began to grow. The people admitted that graft and corruption had been *rife* under Andre, but at least “everybody got his slice of the pie.” Although Prince Schubert was tempted to quit, he determined that he would help the people in spite of themselves.

Ogopogo

Accounts of supersized creatures such as the Loch Ness Monster and the Abominable Snowman are ①_____. Despite the lack of hard evidence, some people continue to believe that the depths of our lakes and isolated mountain caves remain the dwelling places of fantasy figures.

Now, a new star for the credulous has surfaced. Japanese television was asked to ②_____ a search for Ogopogo, a long-necked reptilian creature said to inhabit Lake Okanagan in the mountains of south-central British Columbia. Ogopogo stories are ③_____ in that area as people produce photos of rippling water and shadows resembling an enormous serpent with flippers, gliding slowly in large circles.

Those who ④_____ at what they regard as nonsense and pagan superstition are quite ⑤_____ in belittling Ogopogo fans. Nevertheless, the legends, which have a life of their own, happily, have brought thousands of tourists and business to the Okanagan Valley.

Recognition of the creature now exists in British Columbia's environmental law which provides protection for Ogopogo. The official description reads, "An animal in Okanagan Lake, other than a sturgeon, that is more than three meters in length, and the mates or offspring of that animal."

Been wondering about the creature's name? Ogopogo comes from an English music hall song: "His mother was an earwig; his father was a whale; a little bit of head and hardly any tail—and Ogopogo was his name."

Chlorine Compounds on Trial

The chances are that the water supply where you live is disinfected by chlorine, one of the elements on the periodic table. Yet, ①_____ complaints about chlorine continue ②_____ , identifying it as a health and environmental risk.

Greenpeace, the environmental activist group, stands ready to ③_____ chlorinated organic elements, alleging that they are toxic. The Federal Environmental Protection Agency is reexamining the health hazards that are prevalent when materials containing chlorine are processed at high temperatures. And, worldwide, nations are banning chlorine compounds that destroy the earth's protective ozone layer. Harsh treatment, it would seem, for one of nature's basic elements, a component of the table salt we use.

When we enter a pool that is ④_____ with the aroma of chlorine, we don't associate it with the ⑤_____ element now being blamed for tumors, reproductive problems, arrested development, destruction of wildlife, and sundry other ills that plague our planet.

A scientist with the Environmental Defense Fund thinks that chlorinated chemicals should be phased out. "We know they will be persistent if they get into the environment," she said. "They are soluble, so they will build up in the fat of fish, birds, and people."

History's Most Extraordinary Person?

In a celebrated essay about Joan of Arc, Mark Twain wrote movingly of her brief moment in the spotlight—two short years in which she made an indelible mark on world history. At age 16 she was illiterate, had never strayed from her sleepy little village, knew nothing of military combat, or courts of law. But at age 17, in a complete ①_____ she was named Commander-in-Chief of the French army, vowing to restore her king to his throne. Joan attracted many fervent followers, and a ②_____ called her “France’s ③_____.”

After much gallantry in battle, this ④_____ heroine was brought low by treachery at the French court and captured by the enemy. Joan defended herself brilliantly at a court trial, although she could neither read nor write. She was able to forecast future events with remarkable accuracy, correctly predicting her own martyrdom.

Mark Twain understood how geniuses such as Napoleon, Edison, and Wagner could develop but one could ⑤_____ the facts for a lifetime without being able to explain how this humble peasant girl could display the qualities of a mature statesman, a learned jurist, and a military wizard. He concluded:

“Taking into account her origin, youth, sex, illiteracy, early environment, and the obstructing conditions under which she exploited her high gifts and made

her conquests in the field and before the courts that tried her for her life—she is easily and by far the most extraordinary person the human race has ever produced.”

NEFARIOUS* EFFECTS OF ALCOHOL

Aside from the reasons offered earlier, doctors have other interesting reasons for the *escalation* in female drinking. They also indict* social acceptance and *indifference* to alcohol's *potential* danger as contributory factors. If women realized the harmful extent of the *cumulative* effect of alcohol, they might taper off in their public and *recondite* drinking. Forty-three percent of the female alcoholics in a survey showed evidence of liver damage, and a quarter of the whole group had a high white-blood-cell count. Almost five percent of the patients died shortly after their release from the hospital.

Hair Today, . . .

The fact that a hair salon might charge \$40 for a woman's shampoo and haircut but only \$20 for the same services for a man is a matter of ①_____ to most citizens. Not so to New York City's Commission on Human Rights, which claimed that such a disparity is discriminatory. Commissioner Dennis De Leon has targeted "gender-based" pricing as a violation of city law.

Consider the ②_____ of the salon owners. They ③_____ the price difference, explaining that it takes much longer to cut a woman's hair and requires the use of additional products. But a spokesperson for the Department of Consumer Affairs said that beauty parlors will have to ④_____ with the situation honestly, just as dry cleaners and used-car dealers did when they were apprised of the law.

"I know that women are fighting for equality," said the owner of a chain of unisex hair salons, "but this is ridiculous. We cut a man's hair in no time but we have to get more money from our female customers because their styling and cutting takes so much longer."

The argument might be the ⑤_____ to an important court case. A city-proposed settlement, however, is to have those salons that are cited for violations of the law offer free haircuts to women for a period of three months

before having to pay a stiff fine for repeated offenses.

“It’s easier to comply,” shrugged one owner (bald, himself).

WEEK 23 ❖ DAY 1

FROM A TO Z

Ellis Sloane, a teacher of science at a large metropolitan high school, first paid little attention to the fact that his two biology classes were so disparate* in their performance. In most schools the classes are alphabetically *heterogeneous*, with youngsters' names running the *gamut* from Adams to Zilch. But Biology 121 had only A's and B's, whereas Biology 128 had T's, V's, W's, Y's, and Z's. Mr. Sloane, a *perspicacious* teacher, began to perceive* differences between the two groups: while their reading scores and I.Q.'s were roughly *analogous*, it was apparent that Biology 128 was replete* with *maladjusted* students, while Biology 121 had the normal ones.

As Mr. Sloane pursued his investigation of the *phenomenon*, he discovered that a Dr. Trevor Weston of the British Medical Association had corroborated* his findings. Dr. Weston had studied British *mortality* rates over a *decade*, finding that people whose names began with letters ranging from “S” to “Z” had a life expectancy that averaged twelve years fewer than the rest of the population. THE PERILS OF THE ALPHABET

Dr. Weston is convinced that the *pedagogue* is the culprit.* Since teachers seat their pupils in alphabetical order, the “S” to “Z” child is usually the last to receive his test marks, the last to eat lunch, the last to be dismissed, and so on. As they are the last to recite, these youngsters feel frustrated* because what they had to say had usually been *enunciated* earlier. The *inordinate* amount of waiting that this group has to do causes them to become *irascible* and jittery. “S” to “Z” people also become quite *introspective*, convinced that they are inferior to those at the top of the alphabet.

Microsociety—An Antidote for School Boredom

Money, taxes, employment, legislation—these are topics that we associate with the adult world. George Richmond, a Yale graduate who became a ①_____ in the New York City school system, felt that elementary school youngsters could also be interested, even excited, about such issues. He experimented in his own classes with the *Microsociety* in which basic instruction takes place and is reinforced as pupils operate their own businesses, pass laws, live within the parameters of a constitution that they drafted, seek redress within their own judicial system, buy and sell real estate, and so on.

Richmond's book on the *Microsociety* came to the attention of the school board in Lowell, Massachusetts, and their members decided to give it a try in 1981. In much less than a ②_____ the results were quite remarkable: students exceeded the norm in reading and math; 8th graders passed college level exams; school attendance went up to 96%; and the dropout rate took a nosedive in Lowell.

In *Microsociety's* ③_____ classes, mornings are given over to the traditional curriculum. In the afternoon, the students apply what they learned in activities that run the ④_____ from keeping double entry books, doing financial audits, running a bank, and conducting court sessions to engaging in light manufacture that leads to retail and wholesale commerce.

Other ⑤ _____ school systems have since adopted George Richmond's innovative ideas. "*Microsociety*," said a Yonkers, New York principal, "gets kids to role-play life!"

A *Time Magazine* reporter was much impressed with *Microsociety's* results: "Such an approach would go a long way toward making U.S. public schools a cradle of national renewal."

WEEK 24 ❖ DAY 1

PRIMITIVE MAGIC

In the course of their studies of other cultures, *anthropologists* have reported numerous customs and practices that seem *bizarre* to the average American. Many primitive people believe that certain *inanimate* objects have a will of their own and possess some magical powers. These *fetishes* may be simple things like a particular feather of a bird or a unique pebble. The *fetish* might have derived its power, according to members of some tribes, from a god who lives within the object and has changed it into a thing of magic. *Fetishes* need not only be natural objects, however. An *artifact* such as a sculpture or carving is also believed to possess supernatural powers.

An outgrowth of the idea of a fetish* is the closely related practice of *taboo*. Whereas the gods or supernatural powers merely inhabit an object that is a fetish and lend it magic, they will punish the *imprudent* native who violates their *prohibition* of an act or use of an object or word that has become *taboo*. If a *taboo* has been broken, it becomes *imperative* for the offender to be punished. In many cases, however, the *taint* on the community may be removed after the priests have performed a special ceremony. Map Makers at Work

We are all caught up in the events that change history and the shape of the countries in Asia, Africa, and the Middle East. Each time a country changes its name or its borders, there are some people who have their work cut out for them. They are the map makers—the cartographers. These skilled artists know it is ①_____ to believe that this year’s borders will remain fixed. Has there ever been an ②_____ border?

Looking through an atlas of just a few years back, we realize it is simply an ③_____ of an ever-changing world. If there is one thing for map makers to do, it is to realize how ④_____ it is for them to keep abreast of world events.

The study of world history is replete with exciting events that have shaken the economic and political past. Geography is the physical rendering of these events. As history moves and changes our lives, it is up to the cartographer to take the ⑤_____ lines of a map and shape the picture of this world in motion. A quick search of Google Earth brings our ever-changing planet to our screen.

WEEK 25 ❖ DAY 1

THE EXPLOSION OF KRAKATOA

There are few sights that are more impressive and *awesome* than the *eruption* of an active volcano. There are few natural events that so singularly* dwarf man's *puny* attempts to control his environment. Perhaps the greatest volcanic *eruption* of modern times took place in 1883 when the island of Krakatoa in Indonesia blew up as the result of a volcanic explosion. An enormous tidal wave resulted that proved catastrophic* to the nearby coasts of Java and Sumatra. New islands were formed by the lava that poured out, and *debris* was scattered across the Indian Ocean for hundreds of miles. Volcanic material, *dispersed* seventeen miles into the atmosphere, created startlingly beautiful sunsets for years afterwards.

A UNIVERSAL* DANGER

Man's ability to *obliterate* life on this planet has increased at a rapid rate. We are now faced with the *deplorable* prospect of new weapons that can cause destruction of life and property on a scale far beyond our imagination. No matter who takes the first step to *initiate* a conflict, the possibility exists that the *conflagration* will spread and envelop the world. Much thought has been given to ways and means of preventing this catastrophe.* Some consider it mandatory* that the nuclear powers seek agreement on methods of limiting and controlling these weapons, for in the absence of such an agreement, we may *rue* the day atomic energy was made practical.

TAKEN FOR GRANTED

The presence of an ever-flowing supply of fresh, clean water is taken for granted. Unfortunately, this *congenial* condition is fast disappearing. As our population increases, as industry consumes more water each year, the level of our underground water supply sinks measurably. There is no way to *hoard* water; there are many ways to conserve it. During a particularly dry spell, New York City found its reservoirs going dry. Only then did the residents begin to heed the *sage* advice to limit the wasteful uses of water. Under the *aegis* of the Water Commissioner, citizens were encouraged to develop habits that would save water. The continued imprudent* waste by each of us of this most basic resource will work to the *detriment* of all.

AN AGELESS STORY

Every so often we can read about a man or woman who has reached an age far beyond the limits we ordinarily expect. Reports of a man in Chile or a woman in Turkey who has celebrated the 105th or 110th birthday occur regularly. The natural question is, to what do these people owe their *longevity*? Frequently, the answer concerns the fact that the ancient one liked to *imbibe* regularly of some hard liquor. The photograph will show an apparently *virile* man or robust woman. Somehow, people who reach this advanced age seem to remain eternally sturdy. There are no signs that they have become *senile*. Smoking a pipe, or sewing on some garment, these rare specimens of hardy humanity are far from the *doddering* folk we expect to see.

WEEK 26 ❖ DAY 1

INFORMING THE PUBLIC

Public opinion has an important place in a democracy. The public, often *lethargic*, is susceptible* to a wide variety of influences. The most *prevalent* of these is the mass media. These communications media—the press, radio, and television—have a *paramount* position in initiating,* influencing, and shaping public opinion. Bearing this responsibility, the mass media are often accused of being *remiss* in their duty to inform the public. There has been a great deal of *hostile* comment leveled against these opinion molders.

THE LACK OF FOREIGN NEWS

The critics *rebuke* the press for the fact that most newspapers devote somewhat less than 10 percent of their news space to foreign items. In many hundreds of papers this falls below two percent. Why is there this *aversion* to foreign news? Newsmen claim that readers *evinced* no interest in foreign affairs. In order to increase reader interest in foreign news, the *vogue* among editors is to sensationalize it to the point of distortion. Many other papers do only the most *superficial* kind of reporting in this area.

PLAYING IT SAFE

The average newspaper office receives many times the amount of foreign news than it has space to print. The editor must include or *jettison* items as he sees fit. It is *inevitable* that his ideas of what the reader want to know, or should know, are decisive. Because the newspaper owners do not want to endanger a *lucrative* business, there is the constant *tussle* between personal opinion and the desire not to offend too many readers or advertisers. It is *intrinsic* to the operation of all mass media that they avoid being extremist in their news coverage or editorials.

A FAVORITE NEWS SOURCE

The electronic media—television and radio—have more *acute* problems than does the press when it comes to news reporting. A normal broadcast can cover only a small part of a news day. The object is to transmit the *gist* of a story without supplying its background. Another difficulty of electronic news broadcasting is its *transient* nature; the viewers or listeners may miss an important story if their attention wanders. On the other hand, because radio and television present news in a more *terse* and exciting way, they are accepted as the most *cogent* presentation of news and are preferred and believed above newspapers by most people.

WEEK 28 ❖ DAY 1

A DANGEROUS SPORT

Racing car drivers are *vulnerable* to dangers that other sportsmen seldom face. Drivers agree that controlling a car at top speeds on a winding course is a singularly* awesome* experience. There is the *bedlam* caused by the roaring motors that move the car from a standing start to 100 miles an hour in eight seconds. One is shaken by the *cacophony* of the brakes, larger than the wheels and producing during the course of a 350-mile race enough heat to warm an eight-room house through a hard winter. The driver needs to be on the alert to *exploit* any mistake by an opponent, and he must be constantly aware of the *propinquity* of sudden death.

All of this makes car racing one of the most demanding games of all.

How was your recall today? Did you spot vulnerable as a reintroduced word?

THE MYSTERY OF CREATIVITY

In order to create, it is said that a man must be *disgruntled*. The creative individual is usually one who is dissatisfied with things as they are; he wants to bring something new into the world—to make it a different place. There is no *infallible* way to identify a potentially creative person. The speed-up in the sciences has forced schools and industry to seek a *panacea* for the shortages that they face. The need to discover and develop the creative person has been the source of much study. The paramount* objectives of the studies are to *eradicate* anything that will *impede* the discovery of creative talent and to exploit* this talent to the limit.

Each Citizen's Obligation

Of all the democracies in the world, the United States has the most lackluster record when it comes to citizen participation in elections. Every four years the experts try to analyze the reasons for voter ①_____. Often the eligible voter turnout at election time falls below 50%. This, after months of political campaigning, including televised debates, is a ②_____ situation.

No matter how hard the candidates woo the voters, the end results are often disappointing. Are the voters so ③_____ that they would rather stay home watching television than cast a ballot? Does the voter feel that the candidates are stating one ④_____ after another and is therefore turned off?

The right to vote is so precious that revolutions have taken place where it has been denied. The civil rights struggles of the past were sparked by those who had been denied this right. The greatest ⑤_____ of democracy in this country is said to be the failure of citizen participation in the election process.

WEEK 30 ❖ DAY 1

IN DAYS GONE BY

The man who best described the now *extinct* life aboard a steamer on the Mississippi River is Mark Twain. Having actually worked aboard the river boats, his writing captures the tranquil* or turbulent* events of those days. In his book about life on the Mississippi, Twain recalls the *idyllic* times when man was not in such a great rush to get from one place to another. One chapter deals with the races conducted between the swiftest of the boats. When a race was set, the excitement would *galvanize* activity along the river. Politics and the weather were forgotten, and people talked with gusto* only of the coming race. The two steamers “stripped” and got ready; every *encumbrance* that might slow the passage was removed. Captains went to extremes to lighten their boats. Twain writes of one captain who scraped the paint from the *gaudy* figure that hung between the chimneys of his steamer.

THE JOHN J. ROE

Mark Twain's boat was so slow no other steamer would *condescend* to race with it. With the utmost *candor*, Twain comments that his boat moved at such a pathetic* pace, they used to forget in what year it was they left port. Nothing would *mortify* Twain more than the fact that ferryboats, waiting to cross the river, would lose valuable trips because their passengers grew senile* and died waiting for his boat, the *John J. Roe*, to pass. Mark Twain wrote in a *jocose* manner about the races his steamer had with islands and rafts. WEEK 30 ❖ DAY 3

THE RIVERBOAT PILOT

The riverboat pilot was a man considered *omnipotent* by all. Mark Twain once held that high position. He writes that he felt at the *zenith* of his life at that time. Starting out as a *fledgling* pilot's apprentice, he could not abjure dreams of the time he would become, "the only unfettered and entirely independent human being that lived in the earth." Kings, parliaments, and newspaper editors, Twain comments, are hampered and restricted. The river pilot issued *peremptory* commands as absolute monarch. The captain was powerless to interfere. Even though the pilot was much younger than the captain, and the steamer seemed to be in imminent* danger, the older man was helpless. The captain had to behave impeccably,* for any criticism of the pilot would establish a pernicious* *precedent* that would have undermined the pilot's limitless authority.

TODAY'S IDIOM

in the lap of the gods—out of one's own hands

I handed in my application for the job, and now it is *in the lap of the gods*.

WEEK 30 ❖ DAY 4

THE DOUBLE CROSS

Many incidents that took place aboard his ship are re-told by Twain. One has to do with a wealthy cattle man who was approached by three gamblers. The cattle farmer had let it be known that he had a great deal of money, and the gamblers were trying to *wheedle* him into a card game. He protested that he knew nothing about cards. His *rustic* appearance confirmed that fact. On the last night before landing the three gamblers got him drunk. When the first hand was dealt, a *jubilant* expression came over his face. The betting became furious. All of the proper *decorum* was put aside, and ten thousand dollars soon lay on the table. With the last wager one of the gamblers showed a hand of four kings. His partner was to have dealt the sucker a hand of four queens. At this point the victim, the *charlatan*, removed the veneer* of respectability, and showed a hand of four aces! One of the three professional gamblers was a clandestine* confederate of the “rich cattle farmer.” They had been planning this duplicity* for many weeks.

The Environmental Society

A great deal of controversy surrounds the efforts of environmentalists to protect rare species of animals and birds from becoming ①_____. In order to save these creatures from destruction stemming from a loss of forests or water pollution, environmentalists try to ②_____ large numbers of people to pressure politicians into passing conservation legislation. Often, however, these proposed ③_____ laws are thought to be a burden placed upon business, resulting in a loss of employment.

In the 21st century, the energy and food requirements of an increasing population are at odds with those who would set aside land for birds or animals. There is a great temptation to ④_____ the motives of environmental advocates. It will take people of good will and ⑤_____ to resolve the many difficulties that lie ahead.

WEEK 31 ❖ DAY 1

CHOOSE SAGELY*

Today, the paramount* influence in the forming of public opinion is propaganda. It is not a *heresy* to our democratic beliefs to state that pressure groups play an important part in our lives. Propaganda makes one vulnerable* to the influences of others. The *prudent* person will choose between cogent* and specious propaganda efforts. While propaganda has the *ostensible* purpose of informing the public, the most *fervid* propagandists use methods that must be examined by the thoughtful citizen. The ability to distinguish the *spurious* from the true facts requires more than a perfunctory* examination of prevalent* propaganda efforts.

WEEK 31 ❖ DAY 2

A FREE SOCIETY

In a free society it is intrinsic* that individuals and groups have the inherent* right to *propagate* ideas and try to win converts. We do not look upon an idea different from ours as an *anomaly* that should be precluded*. Nor do we permit only *innocuous* or congenial* beliefs and forbid those that we believe are dubious* or spurious*. In a country of competing pressures we are accosted* by a *surfeit* of propaganda that tends to overwhelm us. Thus, we live in a *milieu* of ubiquitous* bombardment from countless, and often unrecognized, propagandists.

WEEK 31 ❖ DAY 3

WHO LISTENS?

As the quantity of propaganda becomes greater, ideas are presented in more *strident* tones in order to overcome the increased competition. Those who are the targets of the propaganda find it more difficult to discern* between or analyze the new and expanded pressures. The *concomitant* situation that develops with the stepped-up propaganda is one in which the individual retreats into a state of *lassitude*. He has an aversion* to all attempts to influence him. So we can see the intrinsic* weakness inherent* in an increased level of propaganda. It has the *deleterious* result of reducing its *efficacy* upon the individuals or groups who were its objective.

WEEK 31 ❖ DAY 4

THE PEOPLE DECIDE

The place of propaganda in a milieu* that is not free differs from its place in an open society. In a dictatorship there is no competing propaganda. Those who *dissent* from the official line may do so only in a clandestine* manner. Where there is no open *ferment* of ideas, the possibility of discerning* the true from the spurious* is *attenuated*. In a democracy, the inevitable* *arbiter* of what propaganda is to be permitted is the people. It is *incumbent* upon each citizen to choose between competing propagandas while remaining cognizant* of the value for a democracy in the existence of all points of view.

Cross My Palm with Silver

People are fascinated by those who say they can predict the future. Fortune tellers continue to attract gullible customers, and horoscopes are examined daily to see if there is something ①_____ to worry about in the day ahead. One specialist who seems to have found a way to predict something of our future is the palm reader. It is her belief that a long “life line” in the hand means the customer will enjoy longevity.

While this appears to be a ②_____ way to predict long life, a study done in England measured “life lines” of 100 corpses and came up with ③_____ support for the claim: the length of life matched the length of line. The longer the line, the older the person lived to be.

However, there are scientists who ④_____ with believers in this apparent connection. The “life line” of older people is longer only because the hand becomes more wrinkled with age. Length of line is a ⑤_____ of length of life, not the reverse, say scientists.

EVERYONE IS TALKING

Can anyone under the age of 20 remember a time when the dial telephone was the only method of voice communication over long distances? What a *bizarre* concept this must seem for today's youth. It has become an antiquated* cultural form of personal contact. The instrument for the modern communicator is the cell phone, which has *usurped* the wire-connected stationary model. With cell phone companies competing for customers, they eschew* offering a *paltry* number of minutes of talking time. The cell phone user can take advantage of a plethora* of special deals and carry on with significant or *trivial* conversations for seemingly endless time, and in almost any location. Often, these personal talks are held in the most public places, and those within hearing find it difficult to *condone* the inconvenience caused by the indiscriminate* use of this ubiquitous* instrument.

Don't look back at the "new words." Did you spot bizarre as a reintroduced word?

Sample Sentences (note the similarity of *trivial* and *paltry*)

We have ardently* taken to the cell phone as a replacement for the *venerable* dial-up model. The most striking feature of the cell phone is the variety of uses to which it can be put. The dial-up phone is restricted to the *menial* task of mere conversation. For the garrulous* person who isn't restricted to one place, the mobile cell phone has a myriad* of uses. Should one be in an area that requires silence, there is an ability to utilize the *succinct* text messaging feature. Should one come upon an *ambiguous* event that one wishes to keep, one may photograph it or make it into a film for further study. A Formidable Opponent

One of the most interesting tests of a computer's ability to "think" occurred in 1992. The world's chess champion, a man of ①_____ mental ability in this sport, was challenged to compete against the most powerful computer programmed to play chess. The question was, could a machine ②_____ a human's place as the best chess player in the world?

The match took place before hundreds of chess enthusiasts and was recorded on film. While the computer lacked the champion's experience and emotional capacity, it worked with such ③_____ that it could search ahead for many thousands of choices, well beyond what any human could envision. In fact, the computer had already defeated many ④_____ chess masters in preparation for the contest.

The result of this test match was ⑤_____ as far as human self-esteem was concerned. The champion won fairly easily. However, there is almost total agreement that it is only a matter of time before we have an electronic chess champion, one incapable of making a blunder. At that point it will be checkmate for all of us.

WEEK 33 ❖ DAY 2

MAKING PLANS

Robert had arrived in New York a week earlier. He had begun by asking *discreet* questions of Evelyn's former landlord. There was no need to *foment* opposition at the very beginning. The landlord was *recondite*,* and all Robert had been able to *glean* from the cryptic* replies was that Evelyn had moved to a residence that catered to single women. Robert was in a hapless* situation; in this immense city his *quarry* could be hiding in one of dozens of such places. This would obviate* the possibility of his dashing from one place to another in an impetuous* manner. His search, while it had to be concluded with celerity*,* could not be carried out in such *slovenly* fashion. He required a succinct* and meticulous* plan.

WEEK 33 ❖ DAY 3

A NEWSPAPER AD

On the premise* that Evelyn knew she was being sought, Robert's first step was to *abjure* fruitless* searching and place an ad in the leading morning newspaper. He would importune* in a most careful way for her return. The ad read, "Evelyn. Come out of hiding. I do not *reproach* you for your actions. I expect no *penitent* confession. There is nothing ambiguous* about my offer. Please contact Robert." He added a box number for a reply. When Robert went to the paper the next morning, he felt sanguine* about the chances of locating her. His *evanescent* concerns disappeared; there was a letter for him, and with tremulous* fingers he tore it open. It contained one sentence, and it was *tantamount* to a challenge; "If you really care about me, you will find me by midnight, Friday, Evelyn."

WEEK 33 ❖ DAY 4

AT THE BALLET

Evelyn was an anomaly*: she had a *propensity* for folk music and rock and roll dancing, and, at the same time, she was an avid* fan of classical ballet. At one time she had been a fledgling* ballet dancer. Robert headed for a theater where a venerable* ballet company was performing. He knew he had to be *wary* so that Evelyn might not see him first. It was Tuesday evening; two days gone with so little to show. Only three more remaining before the deadline set by Evelyn. He tried hard to *allay* the sudden fear that came over him that he might not locate her. Nothing would *deter* him from succeeding! And so, although he was far from a *connoisseur* of the dance, he was standing among the throng* in the lobby, hoping it would be a propitious* evening for him.

Good Enough to Eat?

There seems to be universal agreement that exposure to the ultraviolet light from the sun is deleterious to one's health. Also, except for tobacco industry spokesmen, there is no dispute about the damage done to us from cigarette smoke. What is shocking is the fact that almost everything we once regarded as either beneficial, or harmless, soon gets challenged by scientists. We are urged to ①_____ foods that have high fat content. There go butter and cheese. Even milk has now been added to the list of foods of which we must be ②_____ .

Whatever diet we are on, we cannot become ③_____ about its nutritional value. We are left, ultimately, with the ④_____ thought that, sooner or later, almost everything we eat or drink may be found to jeopardize our health.

Given that there are many obstacles to maintaining good health, would it be wise to embrace every new laboratory report in order to ⑤_____ information? Let's not discard old, proven, sensible food habits. Also, there is always the possibility that ice cream sundaes will be found to cure baldness, and that chocolate chip cookies will eliminate our cholesterol problems.

WEEK 34 ❖ DAY 1

ANOTHER PLAN

Robert was far from tranquil* as he waited in the lobby for almost an hour after the performance had begun. Disgruntled,* he quit the *site* of his *vigil*. He had to face the fact that he was making no tangible* progress. Tomorrow he would telephone several women's residences. It was a *cumbersome* way of going about the hunt, but it was all that he could think of at the moment. He would *interrogate* the desk clerks, and perhaps he might uncover a pertinent* clue to Evelyn's whereabouts. If he could only get someone to *divulge* her hiding place! Women in the Ring

What sport requires the timing of tennis, the energy of aerobics, the stamina of cross-country running, and the physical contact of football? The answer is: boxing. And now that seemingly male spectacle is attracting women. What was once viewed as ①_____ brutality has been transformed in gymnasiums across the country into the latest form of workout, weight reduction, and energy stimulator.

To suggest that women should not expose themselves to the sharp jabs and powerful uppercuts of boxing because they are the “weaker” sex is ②_____. Properly trained by experts, in good shape from punching bags and jumping rope, women can be as ③_____ in the ring as men.

With women jockeys, race car drivers, hockey goalies, and basketball players, it would require a man with ④_____ prejudice, if not sheer ignorance, to argue that boxing is solely a man’s sport. Anyone who is ⑤_____ with the status of liberated women need not be surprised by their entry into the ring.

WEEK 35 ❖ DAY 1

A MODERN AESOP

The telling of a story in simple terms that has an inherently* important message is a venerable* art form. The *parable* may be found teaching a moral lesson in the Bible. Aesop is an incontrovertible* master of the fable. This story form is far from antiquated* as shown by the *whimsical* approach to life taken by the modern Aesop, James Thurber. His stories *lampoon* the strange behavior of his fellow men. Thurber seems unable to *countenance* the ideas that permeate* our society regarding the rules by which we should live. Least of all is he able to accept the *sanctimonious* notion that some people promulgate* that good always wins out against evil. Thurber's stories often take an exactly opposite point of view.

WEEK 35 ❖ DAY 2

MODERNIZING A PARABLE*

Thurber punctures in an incisive* way the platitudes* that come from stories handed down through the generations. These old saws are accepted by everyone. One such tale is about a tortoise who had read in an ancient book that a tortoise had beaten a hare in a race. The sage* old tortoise construed* this story to mean that he could outrun a hare. With *equanimity* he hunted for a hare and soon found one. “Do you have the *effrontery* to challenge me?” asked the incredulous* hare. “You are a *nonentity*,” he scoffed* at the tortoise. A course of fifty feet was set out. The other animals gathered around the site*. At the sound of the gun they were off. When the hare crossed the finish line, the *flabbergasted* tortoise had gone approximately eight and three-quarter inches. The moral Thurber draws from this *debacle* for the tortoise: A new broom may sweep clean, but never trust an old saw.

THINGS HAVE CHANGED

Thurber modernizes an old story that everyone has read or heard. It has to do with a nefarious* wolf who kept a vigil* in an ominous* forest until a little girl came along carrying a basket of food for her grandmother. With alacrity,* this *vivacious* youngster told the wolf the address to which she was going. Hungry and *gaunt* the wolf rushed to the house. When the girl arrived and entered, she saw someone in bed wearing a nightcap and a nightgown. While the figure was dressed like her grandmother, the little girl surmised* with only a perfunctory* glance that it didn't have the old lady's *mien*. She approached and became cognizant* of the *hirsute* face of the wolf. She drew a revolver from her purse and shot the interloper* dead. Thurber arrives at a moral for this story that anyone would find difficult to *refute*: It is not so easy to fool little girls nowadays as it used to be.

ANOTHER SURPRISE

Thurber's stories are written in a jocose* manner, but they contain enough serious matter to make one *pensive*. He tells of some builders who left a pane of glass standing upright in a field near a house they were constructing. A goldfinch flew across the field, struck the glass and was knocked inert.* He rushed back and divulged* to his friends that the air had crystallized. The other birds derided* him, said he had become irrational,* and gave a number of reasons for the accident. The only bird who believed the goldfinch was the swallow. The goldfinch challenged the large birds to follow the same path he had flown. This challenge served to *whet* their interest, and they agreed with gusto.* Only the swallow abjured.* The large birds flew together and struck the glass; they were knocked into a *stupor*. This caused the astute* swallow to *wince* with pain. Thurber drew a moral that is the antithesis* of the *cliché* we all accept: He who hesitates is sometimes saved.

Beam Me Up, Scotty

In 1966 a television program appeared that quickly established itself as the most successful science fiction series, moved on to become a series of popular films, and continues in reruns to be seen somewhere in this country every night of the year. This original series, *Star Trek*, became so popular that there are huge fan clubs across the country and the stars of the original series are mobbed when they make personal appearances.

What makes this form of science fiction so popular? Some may say that each story of the future is a ①_____ showing us our own world through a presentation of other worlds. There are those who would ②_____ this analysis and argue that it is the odd characters, the ③_____ aliens, who attract us. We watch with ④_____ as worlds battle, knowing it will turn out well in the end.

After many years and many TV episodes and movies, “Star Trek” and its successors continue to ⑤_____ our appetite and bring excitement to our screens. As long as space remains an almost total mystery, the unexplained will capture our imaginations.

WEEK 36 ❖ DAY 1

A LADY NOVELIST

The nineteenth century saw the woman novelist attain the same prestige* as men. England was prolific* in producing women writers. One of the foremost in this *genre* was Charlotte Brontë. In *Jane Eyre* she presented a *candid* portrait of a woman caught up in a clandestine* affair with a married man. Miss Brontë's readers were engrossed* in this story. She took this *unsavory* subject and presented it in a way that did not *degrade* the relationship. She showed that true passion can be healthy. Miss Brontë did not disparage* Jane's feelings or besmirch* her character. The author was generous in her verdict. The affair was considered merely a *venial* sin because Jane was never false in her feelings or her actions.

Make My Ostrich Burger Well Done

Just about 100 years ago, there arose an industry in the state of Arizona that seems very odd to us today. We know of cattle ranches and sheep ranches, but would you believe . . . ostrich ranches? This ①_____ business became popular as women found ostrich feathers a ②_____ addition to their wardrobes.

Ostriches are easy to raise. They eat and drink less than cattle, and their eggs are large enough to feed ten people! During the ③_____ days of ostrich ranching, feathers were sold for as much as \$300 a pound, so it is easy to see why that business was so attractive.

However, women's fashions changed after World War I, and the market for ostrich plumes fell. Growers had to ④_____ a shrinking market. The price tumbled to about \$10 for a bird. As ostrich feathers became ⑤_____ in the fashion world, ostrich ranching came to an end.

Interestingly enough, ostrich ranchers may be coming back into vogue because nutritionists tell us that ostrich meat is low in cholesterol. We may not go wild over the feathers, but pass the lean meat, please. Hold the mayo, too.

WHAT NEXT?

Once the fashion industry has been able to *foist* a new style on the teenager, the older generation tends to *stigmatize* it as some form of rebellion. What is often ignored is that the young consumers *capitulate* to what is originated* by someone outside of their group. The feelings of individuality and *audacity* that the teenager gets from a new style of dress result from the propensity* of their elders to disparage* them. The actual situation is that the clothing fashions soon become accepted by all; there is nothing upsetting or revolutionary about them. While people are becoming complacent* about the “new,” the clothing industry is busy planning how to *tantalize* the teenager with next year’s “fashion.” This arbitrary* decision is guaranteed to foment* consternation* among adults once again in the following year.

SOMETHING FOR EVERYONE

To the derogatory* comments from the older generation the teenagers might *retort* that new fashions and styles are adopted by the elders with alacrity.* Though they complain, women emulate* their daughters by shortening or lengthening their hems. They may appear *reticent* about the bother and expense of altering their wardrobe, but they give *tacit* approval to the change by rushing to the department stores where they jostle* each other to buy copies of the more expensive dresses. The conclusion one might reach after observing how women countenance* the arbitrary* changes year after year is that they are naïve* or victims of some *chicanery* practiced by the clothing industry. TV—The Octopus

Is there anyone you know who can remember a time when there was *no* television? Perhaps a grandparent, but no one much younger is able to do so. At the beginning, only a handful of stations existed. Early programs imitated each other and tended to be ①_____. Some time later, there was the cable TV expansion and greater variety was available. The developing ②_____ was for ever-larger numbers of programs dealing with information as well as entertainment.

The TV industry, never ③_____ when it comes to expanding viewer interests, brought even more channels to the air, broadcasting 24 hours every day of the week. The objective was to ④_____ special groups with programs directed to special tastes and interests. Soon channels devoted to games, to how to fix or make things, to romance dramas, to cartoons, etc., sprang into existence. It appears that every ⑤_____ of a viewer's interest is being addressed. As more and more channels come on the air, as the result of new technology, the variety is expanding beyond anything imagined by those who can recall the beginnings of this magical medium.

He would *flay* both the body and the spirit of anyone who crossed him. The crew developed such an aversion* to Bligh's mortifying actions and *demeanor* that, led by Fletcher Christian, they set the captain and 17 shipmates off in a lifeboat in the South Pacific. The ship continued to the Pitcairn Islands where the crew remained to live with the islanders. Laughton's *delineation* of Bligh remains as the image we have of him. FAIR PLAY!

Recently, there has been an attempt to improve Captain Bligh's tainted* image. Historians maintain that there was no *turpitude* in Bligh's actions aboard the H.M.S. *Bounty*. Perhaps he was imprudent* in failing to keep his temper under control. While an *infraction* aboard ship was quickly criticized, Bligh never carried out those *callous* actions the movie dramatized in order to depict* an evil man, say his defenders. After the mutiny, Captain Bligh astutely* navigated the lifeboat with the other 17 men for over 3,000 miles to safety. This prodigious* feat alone, say those who would restore Bligh's good name, should be enough to allow for a full *redress* of the wrongs that have been blamed on him for over 150 years. Psst . . . Need World Series Tickets?

Think about this for a moment. Is there anything wrong in buying something for one dollar and reselling it for two dollars? Naturally, you would be correct if you saw nothing amiss with this transaction; it's the way a capitalist economy works. But, if you bought a ticket to a rock concert or baseball game for ten dollars and sold it for twenty, you would be committing an ① _____ of the law. You might ask, "What's so ② _____ about this?" The answer is that you would be guilty of the practice known as "scalping." Does an individual who offers a scarce ticket at a price above the original price deserve the ③ _____ connected with the word "scalping"?

These hard-working and risk-taking individuals see themselves as go-betweens in a world where people are willing to spend additional money for a popular event. However, law enforcement officials remain ④ _____ in the face of all reason as they arrest and fine these enterprising salesmen. Those ⑤ _____ believers in punishing law-breakers find nothing wrong with trying to halt the scalping of tickets. For others, it is a way of doing business that they claim hurts no one and is in keeping with a profit-driven economy.

SEEING IS LEARNING

While we are all cognizant* of the importance of words to create certain impressions, gesture is relegated* to a much lesser role. Gestures are an important concomitant* to even the most *vapid* speech, enhancing it and giving the hearer something to look at while he listens. The value of seeing at the same time as listening was shown when a class at a university, *unwieldy* because of its large size, was split up. One group was put into a room in *proximity* to good loudspeakers. Every nuance* of the lecturer's voice could be heard clearly. Because they had no person on whom to place their attention, they soon took on the appearance of extreme *lassitude*; most students became lethargic* and rested their heads on their desks. The separation of visual and aural communication tended to *vitiate* the learning process. Actors depend upon their ability to gesticulate* almost as much as upon speech to obtain their desired histrionic* effects. With them, gesture serves much more than merely to *augment* speech. When their communication is by gesture alone, it is called pantomime. In the early silent motion picture period, gestures were flamboyant.* To show that he was distraught* about the danger in which the heroine had been placed, the hero would go through the most *fatuous* actions. He would stagger, beat his breast, tear his hair, and *contort* his face into the most doleful* appearance. There weren't many simple or restrained gestures in his *repertoire*. In Thailand, Mum's the Word

In this country we take for granted our right to speak out about our elected officials in any way we wish, without fear of arrest or imprisonment. The most disrespectful language is allowed. While some may take ① _____ at an insult against the president, our Constitution protects that right.

Now, consider the country of Thailand. That land in southeastern Asia is ruled by a king. What happens to an individual who fails to ② _____ this monarch? There is a case of a person who joked that if he were king he could sleep late every day and drink wine in the afternoon. For this somewhat ③ _____ remark, he was sent to prison for seven years. Or take the story of the woman who was hanging up the king's photograph. When the police asked her what she was doing, she replied, "I'm nailing it up there on my wall." She said "it" instead of "the king's photograph" and for this ④ _____ alleged insult, she also was sent away for seven years.

While some U.S. citizens may ⑤ _____ our leaders, in Thailand the less said the better.

WEEK 41 ❖ DAY 1

QUEEN OF THE SUPERMARKET

The American housewife is queen of all she surveys in the supermarket. She decides what items shall be purchased. Grocery manufacturers are well aware of her power to make one product a success and another a failure. They spend huge sums developing new products with which to *curry* her favor. Fearful that a successful product will soon begin to *pall*, the manufacturers, without cessation,* come out with “new and improved” versions to whet* her appetite. Sometimes it is only a box or package that has been changed—perhaps a colorful photo of a *succulent* meal on a TV dinner box. In the larger supermarkets the housewife is faced with a *satiety* of merchandise, particularly in the copiously* stocked laundry detergent section. While there may be almost no *intrinsic* difference among the many brands, advertising and packaging serves to importune* her to buy one rather than another.

Did you spot it? The “new word” you’ve seen before? It’s intrinsic.

Sample Sentences Use the new words in these sentences.

1. The connoisseur* of fine foods declared the restaurant the ultimate* in the preparation of _____ meat dishes.
2. She coveted* the antiquated* locket even though it had only an _____ value.

WEEK 41 ❖ DAY 2

IT'S WHAT'S OUTSIDE THAT COUNTS

Packaging of grocery items is a facet* of advertising that is too little appreciated by consumers. Walking up and down the aisles of a supermarket, one seldom stops to analyze the individual package in the *potpourri* of items on the shelves. The manufacturer had to glean* and test many different designs before he accepted the one you see in the array* before you. Before he will *sanction* the use of a particular can, box, or bottle, he must know many things about its efficacy.* He wants to know if the colors attract: a white box may *denote* cleanliness, a red one, strength. There may be a photo or a drawing that will *allude* to the product's use or special qualities. A lackluster* package may be fatal.* Next, the size and shape are important elements. The housewife may want a small package for easy storing, but a larger package may suggest economy. A round bottle may look attractive, but a square one is easier to stack. These are some of the *insidious* aspects of packaging, the main purpose of which is to attract your attention as you peruse* the crowded supermarket shelves.

“TRIED AND TRUE”

Few question the *propriety* of the current haste on the part of manufacturers to bring out “new and improved” products at the prevalent* rate. At one time, in the dim, distant past before the *advent* of television, it was the vogue* for products to be advertised on the merits of their “tried and true” qualities. Few advertisers were *impious* enough to jettison* any part of a product that had been accepted by the public. Year after year, the local grocery store owner would *proffer* the same box of cereal, the same house cleaner. The acceptance was of the time-tested product, and it appeared almost unconscionable* for the manufacturer to change his merchandise. Today’s *spate* of transient* products would have been considered an anomaly* in those days.

WHAT'S IN A NAME?

Supermarkets now carry their own products to compete with the national brands. These “house” brands are not in a felicitous* position because they cannot be advertised widely. Supermarkets overcome this encumbrance* by making these brands less expensive. Many people believe the *shibboleth*,* “You get what you pay for,” and they purchase items on the premise* that quality varies as the price does. Are the claims made by nationally advertised brands *bogus*? How can one bread company *substantiate* its *nutritive* superiority over another? Age Discrimination

One of the most ① _____ forms of discrimination is that based upon age. We have become aware through publicity and education that bias and discrimination based upon race, color, creed, and sex are not to be accepted. Through laws passed by the Congress of the United States and by individual states, we agree that using these criteria for hiring, promoting, or firing in the workplace is a ② _____ and undemocratic excuse. Many lawsuits have supported this most basic right to “life, liberty and the pursuit of happiness” protected by our Constitution.

Why is it, then, that so few question the ③ _____ of preventing those viewed as “too old” from getting positions, or, if already on the job, promotions? Advanced age also leads to the firing of such employees and their replacement with younger applicants. Is there something ④ _____ in youth that suggests that older workers cannot do the job as well? Until age discrimination goes the way of all of the other forms of prejudice, we may continue to ⑤ _____ the reasoning that “younger is better.”

WEEK 42 ❖ DAY 1

YOU CAN'T HELP BUT WATCH

The consumer is in a *quandary* about making a felicitous* selection among the array* of products. The advertisers must influence the malleable* consumer, and often they do it in the most *callous* ways. Television offers many tangible* advantages for reaching the consumer. As a result, the consumer is inundated* by commercials. The advertiser knows that a television commercial is the most *expedient* way to reach large numbers of people. The cost for each commercial film is prodigious,* but because the audience is so large, the cost per viewer is *negligible*. Each commercial is prepared in the most meticulous* way in order to catch the attention of even the most *blasé* viewer and hold it until the message is through.

TRICKS OF THE TRADE

Some television commercials, trying to break through the *ennui* built up in the viewer by the plethora* of competition, employ humor. Others feature a *comely* girl as a pretext* for getting the viewer to stay tuned in. At times raucous* music, accompanied by some *frenetic* activities, is designed to preclude* the viewer's loss of attention. The advertiser will employ every bit of *artifice* at the film maker's command to make a trenchant* commercial. A BETTER WAY

Why is there any question about the propriety* of hiring the physically handicapped? No one who understands their needs can condone* this attitude. The offering of employment should not be considered a *largess*. There should be no need to vindicate* the hiring of a handicapped person. The only *criterion* should be what he is capable of doing. If this is the approach, the handicapped worker will not feel he is an encumbrance* to his boss. The employer, on the other hand, will find it conducive* to good work and will not *repent* his having tried something new just to *mollify* his conscience. Even for the most *mercenary* employer, there should be no reticence* in eliciting* the best that is possible from the handicapped worker.

JUST BE YOURSELF

Socially, the handicapped person is often treated as a *pariah*. Most people hold themselves *aloof* from normal contact with those who are “different.” This social separation propagates* additional feelings of antipathy*. If “normal” individuals would socialize with the handicapped individual, they would learn in a *pragmatic* way that these are people who happen to have a physical handicap; the handicap does not make them any less human. The iniquity* of assuming that physical superiority equals moral superiority prevents all of us from direct human relationships. As long as there is a *vestige* of feeling that handicapped people are inferior, then we are all handicapped in one way or another. Under the *guise* of physical superiority we demonstrate a moral turpitude* that is harmful to all.

Whistle Blowing

There appears to be a question of how much loyalty employees owe to their employers—whether private or governmental. Many companies go out of their way to encourage employees to make suggestions that will improve the way they operate. A ① _____ employer will not criticize or reprimand an employee who points out problems having to do with the way other employees are harming the business. In fact, it should be in the bosses' interest that the person who has become known as a “whistle blower” is encouraged to alert them to a problem.

However, many such whistle blowers face harsh punishment for calling attention to illegal or unethical actions. The whistle blower soon becomes a ② _____ in the workplace. Under the ③ _____ of some minor error, or other excuse, the informer might be demoted, transferred, or fired. This ④ _____ often goes unreported. As a result, the employees go back to “business as usual” without any change. They become used to whatever they may see around them and to the belief that they should not make waves. Thus, no attempt to ⑤ _____ the situation actually takes place.

GOOD NEWS—AND BAD

One of the latent* dangers indigenous* to our constitutional guarantee of freedom of the press has to do with the protection of the individual against the detriment* that might come from news reports involving him. There are *libel* laws that protect against false charges. If an individual believes his character or livelihood have been damaged by a *defamatory* article, he can sue. As the *plaintiff* he must refute* the story and show how the defendant caused him harm by printing a *canard*. The defendant attempts to substantiate* the truth of the article. The printing of news may besmirch* an individual's character, but there is no way to alleviate* this problem without changes in the Constitution. This would be tantamount* to destroying the efficacy* of our coveted* right to learn the truth from the press. THE ISLAND OF WILD DOGS

The saga* of the introduction of that *diminutive* song bird, the canary, into the homes of the world as tame pets is an interesting one. In the sixteenth century a trading ship going to Italy stopped at an island named “Canis,” from the Latin word for wild dog, which could be found there in *profuse* numbers, off the coast of Africa. The *dulcet* song of the wild birds whetted* the interest of the captain. In *impromptu* cages hundreds were taken aboard to be traded. The sailors called these gray-green birds, spotted with yellow, “canaries.” As they approached the island of Elba, near Italy, a *malevolent* storm put the boat in jeopardy* of sinking. A member of the crew released the birds, and the intrepid* canaries instinctively flew towards land. The peasants on Elba took the wild canaries in as pets. Eventually, the birds found their way into homes throughout Europe where they were domesticated and bred for variety of song and shades of colors. The canaries prevalent* today differ greatly from the ones discovered over four hundred years ago.

Reprieve for Wolves

One of the most difficult problems to resolve has to do with the conflicting interests of environmentalists and profit-making businesses. Examples of this dilemma appear frequently. While the dispute about cutting down a forest to preserve owls has been in the news, there appeared another conflict in the state of Alaska. Hoping to increase the number of tourists who seek to hunt deer and caribou, the State of Alaska ordered the killing of some of the ① _____ number of wolves that prey on those animals.

This resulted in a ② _____ of letters and articles condemning the ③ _____ that would result from the anti-wolf policy. So, once again, the environmentalists, who maintain that the natural balance should not be interfered with, ran up against the Alaskan tourist industry, which wants to attract hunters who will increase the state's revenue. After much publicity about the wolf hunt and articles that tended to ④ _____ this policy, Alaska decided to ⑤ _____ the proposed action.

Henry VIII and British History

Students in the United States should consider themselves lucky when it comes to studying the country's history. The United States has been a nation for approximately 225 years. We would be ①_____ if we had to learn as much history as students in Great Britain, for their history goes back some 1,000 years! In that time England has had many interesting and unusual rulers. One who has fascinated us is Henry VIII. Ruling some 450 years ago, he became well known because of his many marriages and his ②_____ for doing away with some wives who displeased him.

In physical appearance he was unattractive—he was large and ③_____. When his first wife could not bear him a son who would be heir to the throne, he divorced her. This caused a break with the Pope who refused to recognize the divorce. Henry VIII sent an ④_____ to the Pope and renounced Catholicism. He then married Anne Boleyn but decided to ⑤_____ her after quickly tiring of her. His third wife died in childbirth, and he divorced his fourth. His fifth, Katherine Howard, was also beheaded. Only his sixth wife was able to live on after Henry's death in 1547. From this brief history of only one English ruler, it is easy to imagine how much an English history student must learn in order to prepare for an exam. In Henry VIII's case, one would have to get a "head start."

WEEK 46 ❖ DAY 1

A MIGHTY EMPIRE

One of the anomalies* of our approach to history is the propensity* to study the venerable* empires of Europe, but we do not feel it incumbent* upon us to *ascertain* anything about the civilizations in our own hemisphere. We deprecate* the history of this part of the world as though progress lay *dormant* and that other peoples were irrelevant* until the settlers of North America arrived at Plymouth Rock. In South America, from 2000 B.C. until their empire reached its acme* at the beginning of the 16th century, lived the Incas. The site* of the capital city of the Inca empire, Cusco, lay at a height of 11,000 feet. This civilization is reputed* to have *burgeoned* until it covered more than 2,500 miles of the western part of the continent. Its population fluctuated* between 4 and 7 million. This empire had a highly efficacious* political and social system. Its *potentate* ruled with absolute power. As the empire conquered new lands, it would *disseminate* its language, religion, and social customs.

A BATTLE FOR POWER

The Inca emperor *derived* his prodigious* power and authority from the gods. The paramount* god was the sun god. It was from him the ruler passed on his *prerogative* to rule to his most astute* son. This *nepotism* had worked with great efficacy* for centuries. The land holdings were immense;* there were rich farmlands and llamas and alpacas for wool. Precious metals were plentiful: silver, copper, bronze, and the most sacred of all, gold. This metal resembled the sun god whom they extolled.* There was no *dearth* of idols and ornaments hammered from this gleaming metal. There was always more gold coming from the mines to replenish* the supply. At the acme* of his power, the Inca ruler died without naming the requisite* successor. In 1528 two sons began an *internecine* struggle for control. For the next 4 years the empire sank into the lassitude* caused by civil war.

WEEK 46 ❖ DAY 3

A PERFIDIOUS* CONQUEROR

The feuding between the rival sons reached its pinnacle* in 1532; at that moment Francisco Pizarro came onto the scene. A native of Spain, he was sojourning* in Panama when he heard of the riches to be found in that far off land. Overwhelmed with cupidity,* but still a *tyro* when it came to wresting* power and wealth from hapless* people, he joined with an inveterate* adventurer. They gathered a small band of mercenaries.* The first two attempts failed, and Pizarro returned to Spain to request authority and money in order to conquer the West Coast of South America. Whether by *sophistry* or cajolery,* he was given the requisite* aid. With a force of 180 men, the dregs* of society, he invaded Inca territory. He reached the city where the current ruler, Atahualpa, was holding court. The Incas welcomed Pizarro who, in a *factitious* display of friendship, heaped *encomiums* upon Atahualpa. Unknown to the Incas, Pizarro had brought guns that were still beyond the technology* of these people. The *obloquy* of his next act, ambushing the Incas and taking Atahualpa prisoner, will live in the history books that are replete* with tales of conquest.

WEEK 46 ❖ DAY 4

THE END OF AN EMPIRE

The Machiavellian* Pizarro held the captured Atahualpa for ransom. He was adamant* about receiving a room filled with gold to the height of a man's shoulder. This was taken as a *hyperbole* at first, but Pizarro knew the gullible* Incas would be *munificent* when it came to rescuing their sacred ruler. They did not procrastinate,* and a frenetic* collection of gold took place. Pizarro, to whom *prevarication* was natural in dealing with the Incas, had no qualms* about executing their ruler as soon as he had the gold. The Inca empire was moribund,* but the *charisma* that surrounded Atahualpa was such that, after his death, the Incas fought on tenaciously* in his name for several years. Eventually, superior weapons quelled* all opposition. A policy of *genocide* was adopted by the Spanish conquerors, and almost two million of these proud people died in the carnage* that followed. PANORAMA OF WORDS

- ❖ Originally introduced in the preceding edition, this section, in which you will find the 1100 words in sources as strikingly disparate as the *Toronto Globe & Mail*, Truman Capote, William Shakespeare, Agatha Christie, Thomas Mann, *TIME*, Machiavelli, and Tom Clancy, validates the contention that this selected group of vocabulary words has been widely used by educated writers.

Most issues of your local newspaper, for example, will contain at least a dozen of the words you have encountered in these pages. But they also appear in advertisements, obituary notices, weather forecasts, cartoons, and brochures of all sorts. Wherever else you come in contact with adult vocabulary—radio and TV shows, news broadcasts, college entrance exams, movie scripts, books—you are likely to find more than a few of the words in *1100 Words You Need to Know*.

Now, for a useful summary of what you have learned in the forty-six lessons, read through the “Panorama of Words,” noting the varied sources of their usage. Be aware that some of the following quotations have been adapted or edited for brevity.

abhor “I *abhor* the process of hiring public servants.” Senator Wayne Morse, speech, 4/17/61

BONUS WEEK A ❖ DAY 1

TITANIC MYSTERY

On April 14, 1912, an incident took place that became a front page story in newspapers all over the world. It is a tale that has continued to capture the attention of movie and theatre goers, of opera and television audiences, of novelists and playwrights—it's the story of the allegedly *impregnable Titanic*, the unsinkable majestic ocean liner that tumbled to the bottom of the icy Atlantic waters with 1600 passengers still aboard.

How could such a *toxic* tragedy have occurred? Could it have been avoided? How could the naval *patriarch*, Captain Edward Smith, no *neophyte* he, have allowed the disaster to happen? What were the *extenuating* circumstances that led to the death of that glorious White Star queen?

In September 1985, the hulk of the *Titanic* was found on the ocean's floor, providing many answers to the questions that seamen and landlubbers had wrestled with over the years.

BONUS WEEK A ❖ DAY 2

WHAT WENT WRONG?

Investigators found that a series of mistakes led to the sinking of the *Titanic*. A wireless message had come in from a French liner, warning of ice ahead, but that was a thousand miles away, and so, no need to worry. On April 13, the vessel *Rapphannock* also warned the *Titanic* of dangerous ice ahead. On the following day, there came a spate* of other warnings from a Cunard ship, a Dutch liner, and the White Star *Baltic*—all telling of icebergs about 250 miles from the *Titanic*'s current position. Next came the German *Amerika*, echoing the same *forebodings*, followed by the *California*, cautioning the *Titanic* about the field ice. Finally, the *Mesaba* called attention to an enormous belt of ice stretching directly across the *Titanic*'s path. All the messages *emanating* from sister ships should have had a profound* effect on Smith and company.

No one *miscreant* could be fingered, but a host of crew members were certainly blameworthy. Why didn't Captain Smith's officers react to those messages? Notations were indeed made on slips of paper but largely ignored and forgotten. There was no standard *protocol* for the handling of such messages; if there had been, Captain Smith would certainly have taken a *circuitous* route so as to avoid the dangerous icebergs.

DEATH KNELL FOR THE TITANIC

And then it happened. White in its innocence, a monstrous iceberg smashed into the luxury liner, ripping an ugly gash of 250 feet along the starboard and causing a fatal wound. Within seconds, thousands of cubic feet of water had penetrated the shattered hull. One after another, dominolike, the watertight compartments and bulkhead were flooded. The unthinkable had happened despite the absolute guarantees of the shipbuilders, Harland & Woolf.

There followed a *macabre* scene as the ship's band, clad in their tuxedos, continued to play show tunes while hordes of terrified passengers, many in nightclothes, rushed toward the lifeboats. The crew called out, "Women and children first," but their lack of an orderly plan for loading would have profound* *ramifications*. In fact, some boats that could hold 30 were sent into the Atlantic with only a handful of people—generally first-class passengers.

As panic began to take hold, the realization that there weren't enough lifeboats exacerbated* the situation, bringing out the worst in a *rapacious* few. Several *insurgent* males ignored the crew and jumped into descending lifeboats. It was an act of shame they would have to live with for the rest of their lives.

BONUS WEEK A ❖ DAY 4

THE LAWYERS' TURN

As one might have expected, manifold* law suits against the White Star Line began to crop up within weeks of the sinking and rescue. The *glut* of billionaires on board (Astors, Wideners, Guggenheims, Strausses, et al.) did not file any claims, but other cases went all the way to the Supreme Court and kept lawyers and judges busy for the next four years. The average claim had been for a modest \$1500, and the average award, paid by the White Star Line, was a *risible* \$1000. White Star's top notch legal staff was accused of using *dilatory* tactics, tiring the claimants until they agreed to settle for a mere pittance*. Their lawyers called many claims *specious* and rejected them out of hand.

The *denouement* of the story is rather sad. American and British maritime law had long given special protection to ship owners on the grounds that their business was such a risky one. And so there was a limit to the amount of money that White Star could be assessed. In the end, they paid only 4% of the \$16 million originally demanded by the survivors and were happy to close the books on the ocean disaster. We can imagine that if a similar tragedy were to take place today, the settlements would be in the hundreds of millions.

GOOD NEWS—AND BAD

On Palm Sunday, April 9, 1865, General Ulysses S. Grant sent a terse* dispatch to Secretary of War Edwin Stanton. It contained the long-awaited sentence that the Confederate General Robert E. Lee had surrendered. The *dolorous* Civil War that had crippled the young nation was finally over.

President Lincoln was only 56 at the time, but he looked twenty years older. The burden of being a wartime president had so *enervated* Lincoln that Surgeon General Barnes feared an imminent* nervous breakdown. When Grant's news reached Lincoln, he went to the front windows of the White House and waved to the crowd below. He proceeded to make a brief speech about the problems of Reconstruction and advocated* the granting of *suffrage* to Negro soldiers.

Among the listeners was a Southern patriot, the popular actor John Wilkes Booth, almost as famous in the theater as his father, Junius. "That's the last speech he will ever make," said Booth to a fellow member of his *cabal* of conspirators. Booth's *odious* plan was to assassinate Lincoln whom he hated passionately, while an associate, George Atzerodt, would do the same to Vice-President Andrew Johnson.

THE DREAMS OF LINCOLN AND BOOTH

Lincoln's family and friends remembered that the President had a *prescient* dream in March, several weeks before the fatal day, and provided them with a *verbatim* account. He told of entering the East Room in the White House where a throng* of people were gathered around an open coffin. In his *reverie*, Lincoln asked a soldier, "Who is dead in the White House?" "The President," was the reply. "He was killed by an assassin."

Mrs. Lincoln said, "I'm glad I don't believe in dreams or I should be in terror from this time forth." Lincoln's was the calming voice, "Let's try to forget it. I think the Lord in His own good time and way will work this out all right."

Of course, all who loved Abe Lincoln would have been deeply agitated if they had known what John Wilkes Booth was planning. As a Southern secessionist, he despised the President. As a *thespian*, he romanticized the action that he could take to rid the nation of a cruel warmonger. Although he had not taken an active part in the Civil War, he was convinced that he could contribute to the Confederate cause by kidnapping the bearded *despot*. It wasn't exactly clear in his mind whether he would "capture" Lincoln and take him to Richmond where he could be exchanged for Confederate prisoners of war—or whether he would just put a bullet in the President's head.

THE ASSASSINS MAKE READY

The *pathological* yet *articulate* Booth had rounded up several co-conspirators and shared his delusions of *grandeur* with them. He had produced a *polemic* that convinced his crew that it would be a patriotic thing to capture the President. One of them was assigned to shut off the master gas valve at Ford's Theatre when Mr. and Mrs. Lincoln were seated there at the play. With all the lights out, Booth would bind and gag the President. Two men would lower Lincoln onto the stage, and then carry him out the rear door to a covered wagon waiting in the alley. They would head for Port Tobacco and then ferry across the Potomac to their ultimate* destination, Richmond, Virginia.

Several dry runs* had not worked out for the cabalists* who were about to reach an *impasse* when Booth learned that Lincoln would be celebrating General Grant's victories with a party at Ford's Theater on the night of April 14. He promised the small group that destiny was at hand; their bold act, he said, would make their names famous forever in the annals of U.S. history.

In the late afternoon of April 14, Booth watched a rehearsal of the play that would be performed that evening. He had reviewed his action plan and the escape route, and he believed it to be foolproof. He mouthed the phrase he would use after killing Lincoln, "Sic Semper Tyrannis" ("Thus always to tyrants").

The curtain was about to go up on one of the darkest days in the country's history.

“NOW HE BELONGS TO THE AGES”

At 8:25 the Lincolns arrived at the theater. When they entered Booths 7 & 8, as *regimen* dictated, the band played “Hail to the Chief.” The 1675 members of the audience stood to honor the great man, and then the play commenced. It is reported that Booth said to a drunk who had *denigrated* his acting skill, “When I leave the stage, I will be the most famous man in America.”

At about 10 P.M., with extreme *guile*, Booth had managed to be behind Box 7 in the darkness of the hallway. He saw the silhouette of a head above the horsehair rocker. Derringer in his hand, he aimed it between the President’s left ear and his spine. The shot was drowned out by laughter on the stage. Shouting “Revenge for the South,” Booth climbed over the ledge of the box and jumped onto the stage, breaking his leg in the process.

In pain, Booth limped out the stage door where his horse was waiting and made his getaway. Days later, however, he was cornered in a Virginia barn and shot. Three of the cabal* members were arrested and hanged.

At the theater, a 23-year-old doctor attended to the wounded President. He found that the lead shot had lodged in Lincoln’s brain, a bad sign. Several soldiers carried Mr. Lincoln across the street to a private house. His family physician came and so did the Surgeon General. The President struggled throughout the long night, but it was apparent that a *mortal* wound had been *inflicted*, and he could not be saved.

At 7:22 A.M. it was over; two silver coins were placed on the assassinated President’s eyes. Then Secretary Stanton uttered the famous words, “Now he belongs to the ages.”

Perks Are In

Do you know what a “perk” is? Simply put, it’s an extra reward, a special benefit given to sweeten the job for an employee. Now an ① _____ staffer at Serus, a software maker in California’s Silicon Valley, has skillfully described an incredible perk given to him and his fellow workers—a thrill-packed parachute plunge as they jumped from a plane 14,000 feet above the ground.

“Our employees work hard and can become ② _____,” said a Serus executive, “and we want to invigorate them with sky dives, as well as cruises, beauty treatments at spas, birthday parties, maid services, and other creative perks that our ③ _____ might conjure up.”

Of course, company executives are deeply interested in keeping productive staff members from quitting and going to work for competitors. And so, the host of perks they offer reflect the ④ _____ behind their generosity. “Cash bonuses won’t have the same effect,” a CEO said. In a ⑤ _____ remark he declared, “It’s like a parent who throws money at his child when what the youngster really wants is attention.”
